

e-Ticketing and Unifier

By: Billy Sweeney

And Mark Buckalew

e-Ticketing: FHWA EDC-6 Initiative

Definition:

 A paperless process for tracking, documenting, and archiving materials tickets, accessible in real-time via mobile devices.

Types of e-Tickets:

- Initially, Hot-Mix, Concrete, Borrow, Aggregate.
- Potential later additions, rebar, pipe, drainage inlets, structures, guardrail, signs, etc.

Benefits:

- Enhances project delivery.
- Integration with Unifier.
- Quality of information.
- Archiving the tickets in a digital format.
- Improves accessibility of project data.

- Time savings.
- Improvement in safety.
 - Reduces exposure to vehicular traffic.
 - Less human to human interaction (Covid).

e-Ticketing Process Checklist

Legal and DTI

- Agree to the Terms Of Use and Conditions.
- Agree to the Delaware Cloud Services Terms and Conditions
- Compliant with DelDOT record retention guidelines.

Material Producers and Suppliers:

- Address concerns from the private sector.
- Develop an integration program to convert suppliers ticket data.
- Run a pilot and develop a timeline for implementation.

DelDOT Departmental Integration:

- Integrate tickets produced and sent to the central hub into Unifier.
- Address concerns from Support Sections and Maintenance to integrate their processes.
- Train staff and consultants with the new process.
- Update the Standard Specifications.
