Success Stories, Large and Small

Two days after returning to the U.S., from his first trade mission with WTC Delaware, Mohamed Cisse's company, Tungsten Global Consulting, closed a deal on lab equipment to a connection made in Ghana. He's bidding on a laboratory information management contract with another prospect. And he's projecting **\$250,000** in sales for the year from the trade mission alone.

Several years ago, one of our members wrote to Governor Carney that with WTC Delaware assistance, the biotech company was projecting **\$100,000,000** in sales.
