

# DelDOT – Development Coordination

## Design Deviation Form

Project Data			
Design Deviation Name:			
Project Name:			
Engineer of Record:			
Parcel Number:			
Frontage Road:		Functional Classification:	
Limits of Applicability:			

Describe the location of the area for Design Deviation request: (Provide Station references if applicable)

Design Deviation Abstract: (Provide a detailed explanation of the sound Engineering Judgment, or Engineering Study at DelDOT’s discretion, to justify the proposed design deviation. Discussion should include: existing conditions, context, constraints, design alternatives considered, etc.)

Based upon the conditions presented, it is recommended that a design deviation be approved for the substandard design element as justified.
