

SECTION 11

STANDARDS AND SPECIFICATIONS

Standards

Plans showing construction details of frequently used construction items have been prepared by the Department. Copies of these "Standards" may be purchased from the Department.

These standard details shall be utilized in the construction unless there is some unusual circumstance requiring a special design. The plans shall show construction details for each construction item not shown in the "Standards". A list of the applicable "Standards" is to be shown on the title sheet.

Specifications

Specifications for frequently used construction items have been prepared by the Department. Copies of these "Standard Specifications" may be purchased from the Department.

The construction of subdivision streets shall be in accordance with the current "Standard Specifications". Should it be necessary to construct an item for which a standard does not exist or where it is desired to modify the "Standard Specifications" special provisions shall be furnished with the final construction plans.
