

ABSTRACT

The Louis Berger Group, Inc. (Berger), conducted a National Register of Historic Places architectural evaluation survey along two portions of U.S. Route 13 in Dover for the Delaware Department of Transportation. Architectural investigations took place from Loockerman Street to Division Street and from White Oak Road to Townsend Boulevard. A total of nine individual resources over 50 years of age were inventoried. None of these resources have been previously listed in or determined eligible for listing in the National Register. Berger recommends none of the nine resources as meeting National Register eligibility criteria.
