Baker Property

General Description. The Baker Property is located at 7764 Bay Road (SR 1) on the east side of the road. The property consists of a former gas station/market (currently an unoccupied residence) constructed ca. 1935-1940. A grassy yard surrounds the building to the north, south, and east, and a gravel parking lot is located immediately west of the building. The parking lot was historically used for commercial use as a parking lot for the gas station; however, there are no remaining structures associated with any of these functions. The property is in good condition.

Building. The dwelling is a single-story, light timber frame, vernacular building with a flat roof. It rests upon a concrete foundation. The entire exterior of the dwelling is clad in vinyl siding. An attached garage is located at the northern end of the building. Window openings in the dwelling contain vinyl, replacement, one-over-one, double-hung sash windows and single-light picture windows. An open frame shed-roof porch extends the width of the façade (west elevation), and five thin, wood posts support the porch roof. The porch floor, which runs three-quarters of the length of the façade, is a concrete slab resting directly on the ground, with three concrete steps extending the width of the slab. The building's roof features a vinyl-clad parapet on the facade.

The façade (west elevation) of the dwelling consists of four bays, including one pedestrian entrance, one garage bay, and two window openings. The entrance is located in the second bay from the south end of the elevation, and contains a single-light, one-leaf replacement door. A modern sidelight is located immediately north of the entrance. Two large, single-light picture windows flank the entrance. The garage entrance is located in the northernmost bay, and contains a modern, retractable garage door.

The north elevation of the building consists of a solid wall lacking fenestration. The south elevation contains a single, one-over-one, double-hung sash window at the western end of the elevation.

The east elevation consists of three bays, containing two off-center entrances and one window opening. The entrances contain single-leaf doors, and the window opening contains a single, one-over-one, double-hung sash window. A small, open, wood frame porch is attached to the northern end of the elevation.

Historical Background. On June 2, 1930, the Associated Realty Corporation sold the property containing .68 acres to Charles W. Baker (KCDB V13: 20). On August 15, 1946, Charles W. Baker sold the property containing .68 acres along "...with all buildings and improvements" to Elsie Williams for \$250 (KCDB X17: 390). On January 13, 1948, John Howard Williams and Elsie Williams sold the property containing .68 acres to Frederick P. Lorenzen for \$300 (KCDB F18: 332). Although Frederick Lorenzen conveyed the property to Mildred Thomas (Lorenzen) as a last testament and will, John Williams, Jr. bought the property before the execution of Lorenzen's will, and the property was therefore conveyed to John Williams, Jr. and his wife Bertha R. Williams

(KCDB N37: 213). On March 17, 1988, Bertha R. Williams, widow, sold the property containing .68 acres to John T. Krasulak, and his wife Katherine J. Krasulak, for \$35,000 (KCDB T44: 247). On February 4, 2003, John T. Krasulak conveyed the property containing .68 acres to Katherine J. Krasulak (KCDB D521: 180).

Evaluation. The Baker Property is recommended not eligible for listing in the National Register of Historic Places because it does not meet the eligibility criteria established by the National Park Service (NPS 1997). The resource is an example of an altered, twentieth-century property within the SR 1 Interchange study area. The resource retains integrity of location and setting, but lacks integrity of design, materials, workmanship, association, and feeling, and is unable to convey its historical or architectural significance. It is not a noteworthy example of a residence or of a commercial property.

Property-specific research and documentary research of the area in general did not reveal any associations between this property and significant events or trends. The property is recommended not eligible for listing in the National Register under Criterion A for this reason. Likewise, research did not reveal any associations with significant individuals; therefore, the property is recommended not eligible for listing under Criterion B. The property does display the distinctive characteristics of a type, style, or method of construction, nor does it represent the work of a master or possess high artistic value; therefore, it is recommended not eligible under Criterion C. Archaeological investigations have not yet been conducted on this property; therefore, the resource's eligibility under Criterion D (potential to yield information important to history or prehistory) cannot be assessed at this time.
