

PHOTOGRAPHS

Photograph 1. General view of Test Area 1, facing west-northwest.

Photograph 2. General view of Test Area 2, facing east.

Photograph 3. General view of Test Area 3, facing west.

Photograph 4. General view of Spring Banke, facing north.

Photograph 5. General view of Test Area 4, facing east.

Photograph 6. General view of Test Area 5, facing east.

Photograph 7. General view of Test Area 6, facing east.

Photograph 8. General view of Test Area 7, facing east.

Photograph 9. General view of Test Area 8, facing west.

Photograph 10. General view of Test Area 9, facing north.

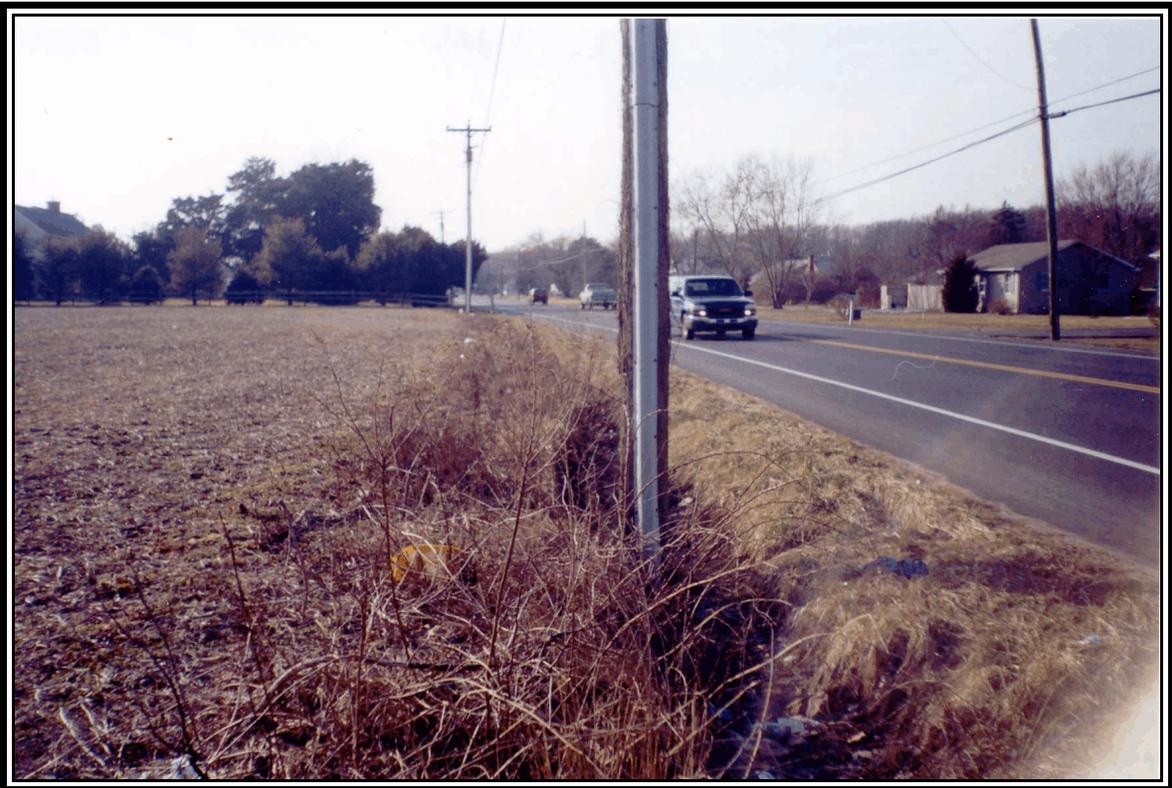

Photograph 11. General view of Test Area 10, facing west. The tape follows the southern edge of the project APE.

Photograph 12. General view of Test Area 11, facing west.

Photograph 13. General view of Test Area 12, facing east.

Photograph 14. General view of Test Area 13, facing west.

Photograph 15. General view of Test Area 14, facing southeast.

Photograph 16. General view of Test Area 15, facing east.

Photograph 17. General view of Test Area 16, facing east.

Photograph 18. General view of Test Area 17, facing east.

Photograph 19. General view of Test Area 18, facing east.

Photograph 20. General view of Test Area 19, facing west.

Photograph 21. General view of Test Area 20, facing east.

Photograph 22. General view of Test Area 21 after excavation, facing east.

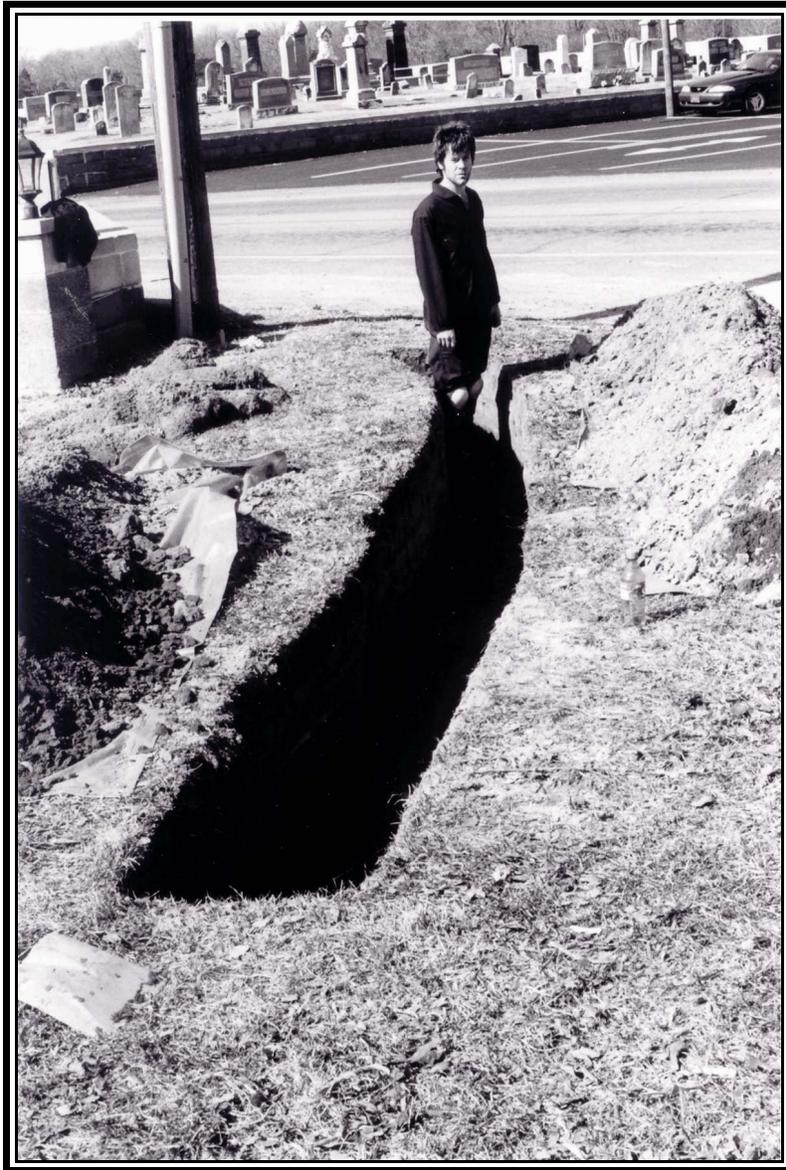

Photograph 23. General view of Test Area 22, facing west.

Photograph 24. General view of Test Area 23, facing southwest.

Photograph 25. General view of Test Area 24, facing south.

Photograph 26. Excavated trench in Test Area 10 adjacent to St. Georges Cemetery, facing west.

Photograph 27. General view of Messick Cemetery, facing northeast.

Photograph 28. Excavated trench in Test Area 7 adjacent to Messick Cemetery, facing west.

Photograph 29. Mechanical scraping in progress at Test Area 21 adjacent to the Mariners Bethel Cemetery, facing east.

Photograph 30. Surface of subsoil after mechanical scraping and hand cleaning around the marble sign base in Test Area 21 adjacent to the Mariners Bethel Cemetery, facing west.

Photograph 31. Completed scraped portion of Test Area 21 with Parsons' Store foundations uncovered, facing west.

Photograph 32. Typical portion of the project APE that was not tested due to the presence of paving, trees, and buried utilities associated with a residence, facing east.

Photograph 33. Typical portion of the project APE that was not tested due to the presence of paving, and extensive disturbances to the sediments from the emplacement of sub-surface and above-ground utilities, curbs, a new bank building, and signage, facing east.

Photograph 34. Typical portion of the project APE that was not tested due to the total regrading of the sediments during commercial development and the installation of a paved parking lot with drainage and utilities, facing east.

Photograph 35. Typical portion of the project APE that was not tested due to the presence of a paved parking lot, facing south.

Photograph 36. Typical portion of the project APE that was not tested due to the presence of buried utilities, facing east.

Photograph 37. Typical portion of the project APE that was not tested due to the presence of grading, and utility and drainage installation, facing west.
