

Welcome!

On behalf of the Delaware Department of Transportation (DeIDOT), we welcome you to these Public Workshops on the Millsboro-South portion of the US 113 North / South Study.

A concerted coordination effort with various state and federal regulatory agencies has occurred since our last series of workshops. This effort has focused on documenting environmental impacts of the Alternatives Retained for Detailed Study and working toward a Recommended Preferred Alternative, which we are presenting this evening. We invite your comments on our preliminary recommendation as well as on the other alternatives that were also retained for detailed study.

Thank you for sharing your valuable time and insights.

Carolann Wicks
Secretary
Delaware Department of Transportation

Purpose Of Workshop: Present And Listen

The goal of the US 113 North / South Study has been and continues to be to identify, select, and protect a corridor for a limited access highway where Sussex County's future transportation needs could be met. The purpose of these workshops is to obtain input from you, the public, on DeIDOT's preliminary Recommended Preferred Alternative for the Millsboro-South Area portion of the US 113 North / South Study.

DeIDOT has developed a Draft Environmental Impact Statement (DEIS) that is currently under resource agency review and refinement, and is expected to be available for formal public and resource agency review and comment by the end of this year. Your comments today will help in completing the DEIS and making it available for your review and comment.
