

STATE OF DELAWARE
DEPARTMENT OF TRANSPORTATION
800 BAY ROAD
P.O. BOX 778
DOVER, DELAWARE 19903

SHAILEN P. BHATT
SECRETARY

May 2, 2013

Mr. Bill Weller
216 Oak Drive
Middletown, DE 19709

Dear Mr. Weller:

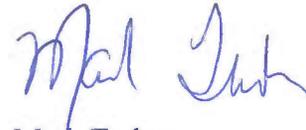

I believe our meeting of April 11, 2013 was very productive and provided the Department with a clear understanding of the concerns that the Airmont Community has regarding the US 301 mainline project. In response to questions raised during the meeting, the following summarizes the DelDOT Team's commitment regarding follow-up activities:

- Further consideration of the communities desire to raise the berm height from 12 ft to 16 ft
- Establishment of Construction Working Groups for the project that would meet during construction
- Does NEPA require an analysis of vibration
- Review the Circuit 8 court case in regard for the need for a vibration analysis
- Continue the outreach with the local emergency response agencies to review the temporary proposed closure of Airmont Drive at Hyetts Corner Road during construction
- Review construction sequencing to determine the earliest that Hyetts Corner Road to the east of the Vo-Tech School can practicably be opened
- Confirm if a qualitative and/or quantitative analysis of Air Quality is required for the first year of operation, which is estimated in 2017
- Review the issues that were considered in making the decision to identify the Green North alignment as the Preferred Alternate instead of the Green South alignment

Mr. Bill Weller

As discussed, we will be returning to the community with our responses to the questions in about 2 months. Thank you for the thoughtful questions. If you have any questions in the meantime, please contact me at 302-760-2371.

Respectfully,

Mark Tudor
Assistant Director
North Project Development
