FROM: Mark Luszcz *ML*
Chief Traffic Engineer, DOTS

DATE: February 25, 2015

SUBJECT: 2015 DelDOT Traffic Design Manual – Final Version

The Traffic Section is pleased to submit the final approved version of the Traffic Design Manual. Enclosed please find a CD copy of the final Traffic Design Manual for your use. A copy of the manual will be published on the DelDOT Website and Design Resource Center (DRC).

This manual replaces the DelDOT Signal Manual, last published in 2000. In addition to making the technical signal design practices consistent with current best practices, the manual includes major new sections on the traffic systems design process, justification procedures for new traffic signals, and ITS design.

Should you have any questions or comments, please feel free to contact Monroe Hite at (302) 659-4088. Thank you for your assistance in finalizing this document.
