**Construction Plan Submission Checklist for Division of Transportation Solutions Projects**

---

**Directions for Completing the Checklist**

- This checklist indicates what content should be included on each plan sheet at each submission.
- The checkboxes  indicate that information is required and must be included in the plan submission.
- For each submission, indicate that the required information has been included in the plan submission by placing an "X" in the appropriate checkbox.
- Items may need to be added for some projects and may not be required for others. If the Project Manager determines an item is not required, place a strikethrough line through the item that is not required.
- DelDOT's Project Manager shall review this checklist with the Designer/Consultant at each submission to verify that all necessary information has been included in the plans and shall sign below for each submission to attest to the completeness of the plan submission. (Electronic Signature is Acceptable)

<b>Sheet Layout</b>				
North Arrow (Upper right corner of sheet)			<input type="checkbox"/>	<input type="checkbox"/>
Sheet type identifier and number completed			<input type="checkbox"/>	<input type="checkbox"/>
<b>Grades</b>				
Pavement cross slopes denoted by cross slope percentage and direction arrow given at break points. Break points are denoted by "+" station referenced to construction baseline.			<input type="checkbox"/>	<input type="checkbox"/>
Splined pavement grades around intersecting roadways should be given at 10' intervals along the intersection curves.			<input type="checkbox"/>	<input type="checkbox"/>
In transition areas from normal crown to full superelevation, pavement grades should be given at 25' intervals along pavement break lines, coincident with construction baseline stationing.			<input type="checkbox"/>	<input type="checkbox"/>
Grades should be given at the face of curb of all curbs or at the edge of gutter pans for curb and gutter at 50' intervals, except for superelevation transition sections. In superelevation transition sections, grades shall be given at 25' intervals.			<input type="checkbox"/>	<input type="checkbox"/>
Label all vertical alignment high points (HP) and low points (LP) on the plan sheets.			<input type="checkbox"/>	<input type="checkbox"/>
Grades and offsets for roadside ditches should be given at 50' intervals, coincident to construction baseline stationing where applicable.			<input type="checkbox"/>	<input type="checkbox"/>
<b>Geometrics</b>				
Pavement widths given at all break points; break points are denoted by "+" station referenced to construction baseline. Alternatively, coordinates can be shown at all pavement width and sidewalk break points.			<input type="checkbox"/>	<input type="checkbox"/>
Display radius of all intersection curves and island curves, unless otherwise covered by a note on the plan sheet. (See Model Plans)			<input type="checkbox"/>	<input type="checkbox"/>
