NOTES:
8. The work shall consist of installing a sandbag dike for the purpose of erosion control when construction activities take place within the stream channel such as bank stabilization or bridge abutment construction.
20. The sandbag dike shall be installed at the upstream location first.
20. Year storm, or equal with the top of bank, whichever is less.
40. All dewatering of the disturbed area shall be pumped to the specified dewatering device prior to re-entering the stream.
50. The spillway shall be sized to pass a 111-year storm event peak flow.
60. The pipe, when utilized, shall be sized to pass the stream base flow.
