1. When PCC curb or integral PCC curb and gutter is placed adjacent to Portland cement concrete pavement, construct the joint as per the longitudinal joint sealant detail on detail P-2, sheet 3. Use approved joint filler to seal. Work to be paid under respective curb and gutter item.

2. The depressed curb dimensions (including 1" lip) on this sheet are for use at entrances only. For curb depressions at pedestrian connection, see Note 3.

3. At pedestrian connections, depress curb flush with the pavement (with no lip). Slope the top of the curb 8.3% or flatter in the direction of pedestrian travel.

4. Depress curb flush with pavement or adjacent area to all corner radii of triangular islands, tapering back to full height at a rate of 4:1.

5. The depth of curb run not part of an island or median flush with pavement or adjacent area at a rate of 12:1.

6. Install Typ IV polyurethane-bonded recycled rubber expansion material between the face of curb and edge of PCC pavement.
