

Illustration Credits

Historic photos and illustrations in this book are from the collection of the Delaware Department of Transportation, unless otherwise noted. Most contemporary bridges photos were taken in 1988 or 1997 during field inspections.

Original graphics were prepared by Joe Macasek of MacGraphics, Morristown, New Jersey.

Acknowledgments

Acknowledgments

This book is a collaborative effort. It is a considerably revised second edition of the Delaware State Highway Department's *Delaware Historic Bridges Survey and Evaluation* (1991) prepared by P. A. C. Spero & Company. Much of the information from the previous edition has been incorporated into this revised edition by Lichtenstein Consulting Engineers, Inc. The format and presentation have been changed, and much new and updated information has been added.

The book incorporates research and conclusions developed for the Delaware historic bridge survey and update projects of the Delaware Department of Transportation, Division of Highways, Location and Environmental Studies Office, in cooperation with the Delaware State Historic Preservation Office and the U. S. Department of Transportation, Federal Highway Administration. Many individuals have participated as advisors, reviewers, and commentators during the preparation of this book. Michael C. Hahn and Therese M. Fulmer in the Location and Environmental Studies Office have vigorously supported and guided the project. Expert advice and access to the bridges, bridge files and plans was provided by Muhammed Chadri and Dennis O'Shea of DelDOT's Bridge

Department. Juliana Y. Cheng, DelDOT's librarian, helped locate many old records and files in the department's invaluable and well-organized library. Throughout the effort, the Delaware State Historic Preservation Office staff, including Joan Larrivee, Gwen Davis, and Robin Bodo, has been supportive. They provided access to their files and records and shared their knowledge of the state and its historic resources. David W. Campbell of Delaware Transit Corporation's Rail Services made important contributions as a reviewer of the railroad chapter.

Many Lichtenstein staff members have contributed to the project. Project management was provided by Joseph Pullaro and Rick Kreppel, who also provided expert advice on matters of historic engineering. Jeri-Ann Ciampa carefully typed and proofed the text. Mary McCahon has made significant contributions as a project manager, historian, co-writer, and editor. The layout of the book and the original art and graphics are a credit to Joe Macasek.
