

## LIST OF FIGURES

### Frontispiece. Schoolchildren Learning Excavation Techniques at Hickory Bluff

1.1	Location of Hickory Bluff on the Delmarva.....	1-2
1.2	Aerial View of Hickory Bluff, Looking East.....	1-3
1.3	Comparison of Prehistoric Chronologies.....	1-4
1.4	Puncheon Run Connector Passing Across Hickory Bluff and the St. Jones River.....	1-5
1.5	Hickory Bluff Fieldwork Map by Hunter Research .....	1-7
1.6	Data Recovery Excavations by Hunter Research .....	1-9
1.7	Westernmost Block Excavated by Hunter Research (Locus A, Block 2).....	1-9
1.8	Planview Showing Projected Outlines of Overlapping Pithouses 2-9 by Hunter Research.....	1-10
1.9	Alternate Pithouse Model proposed for Hickory Bluff by Hunter Research.....	1-12
1.10	Contour Plot of Artifact Density in Shovel Test Pits.....	1-13
1.11	Block Excavation Distribution Relative to STP Artifact Densities .....	1-15
1.12	Locus G Excavations, September 1998, Looking East.....	1-16
1.13	Loci H and G Excavations, September 1998, Looking Southeast.....	1-16
2.1	Feedback Mechanisms in Complexity Theory .....	2-6
2.2	Woodland Pithouse Model.....	2-17
2.3	Taphonomy of Pithouse Features .....	2-18
2.4	Distribution of Features at the Snapp Site .....	2-19
2.5	St. Jones Adena site showing Burial Loci .....	2-24
2.6	Biface Cache Blades, St. Jones Adena Site .....	2-25
2.7	Late Archaic/Early Woodland Territorial Model .....	2-26
3.1	Number of Federally Listed Tribes by State.....	3-5
3.2	DelDOT Public Visitation Numbers, 1980-1999.....	3-7
3.3	Public Outreach Site Components at Hickory Bluff.....	3-9
3.4	Display Station at Hickory Bluff .....	3-10
3.5	Pubic Archaeology Considerations.....	3-12
3.6	News Release by DelDOT Office of External Affairs on Hickory Bluff.....	3-14
3.7	Television Interview .....	3-15
3.8	Media Coverage during Hickory Bluff Project.....	3-15
3.9	Hickory Bluff Brochure .....	3-18
3.10	Example of a Stratafacts Sheet .....	3-19
3.11	Public Groups Visited during the Hickory Bluff Project.....	3-20
3.12	Orientation at Display Station.....	3-21
3.13	Visitors Observing General Excavation Techniques .....	3-22
3.14	Public Groups that Visited Hickory Bluff .....	3-22
3.15	Visitors Learning about Careful Feature Excavation Techniques .....	3-23
3.16	Visitors Screening Hickory Bluff Deposits to Retrieve Artifacts.....	3-24
3.17	Professional Outreach at Hickory Bluff.....	3-25
3.18	Nanticoke Public Blessing Ceremony .....	3-28
3.19	Total Public Participation for the Hickory Bluff Project.....	3-29

4.1	Location of Hickory Bluff .....	4-1
4.2	Orthophoto map of the St. Jones River Valley between Dover and Delaware Bay .....	4-2
4.3	Surficial Geology Map of Kent County, Delaware .....	4-4
4.4	Paleoenvironmental Reconstruction of the Columbia Formation and the Distribution of Coarse Texture Clasts .....	4-5
4.5	Bottom Configuration of Delaware Bay, Drowned Channels, and Tidal Marshes .....	4-7
4.6	Holocene Transgression of Delaware Bay and SR 1 Stratigraphic Column of the St. Jones River near Hickory Bluff .....	4-10
4.7	Model of the Middle-to-late Holocene Evolution of the St. Jones River Valley Near Hickory Bluff .....	4-12
5.1	Capt. John Smith's 1608 Map of the Chesapeake Region and the Delmarva .....	5-2
5.2	Augustine Herrman's 1659 Map of the Delaware Bay Region .....	5-4
5.3	Lenape Groups at Contact .....	5-5
5.4	Reservations on the Eastern Shore after 1650 .....	5-9
5.5	Eighteenth Century Reservations of the Maryland Colony .....	5-10
5.6	Palisaded Village of Pomeiooc .....	5-14
5.7	Dispersed Settlement of Secoton .....	5-15
5.8	Major Trails out of the Chesapeake Region .....	5-18
5.9	Large Scale Communications Network .....	5-19
5.10	Late Woodland and Contact Period Prestige Goods Trade Routes of the Mid- Atlantic Region .....	5-20
5.11	An Eighteenth Century Depiction of a Manitou .....	5-22
5.12	Powhatan's Mantle with Circles Depicting Sub-Chiefdoms under His Control, circa 1608 .....	5-26
5.13	Layout of an Early Twentieth Century Delaware Big House Ceremony .....	5-27
5.14	Drawing of Tortoise Shell Rattle Used in the Delaware Big House Ceremony .....	5-33
6.1	Profile of Unit N337 E691 .....	6-3
6.2	Geoarchaeological Data Profile of N337 E691 .....	6-4
6.3	Profile of Unit N309 E659 .....	6-6
6.4	Geoarchaeological Data Profile of Unit N309 E659 .....	6-7
7.1	Location of All TAS (A1) Features by Type .....	7-5
7.2	Feature 98 in Bisection (excavation in progress) .....	7-6
7.3	Composite Planview of Feature 284 .....	7-6
7.4	Excavation of Feature 296 (in progress) .....	7-7
7.5	Excavation of Feature 46 (in progress) .....	7-8
7.6	Excavation of Features 87, 88 and 89 (in progress) .....	7-8
7.7	Excavation of Feature 176 (in progress) .....	7-9
7.8	Excavation of Feature 55 (in progress) .....	7-10
7.9	Planview of Feature 164 .....	7-11
7.10	Planview of Feature 281 .....	7-12
7.11	Location of All Artifact Cluster Features by Type (non-TAS) .....	7-13

7.12	Planview of Feature 114 .....	7-13
7.13	Planview of Feature 178 .....	7-14
7.14	Planview of Feature 415 .....	7-14
7.15	Planview of Feature 84 .....	7-15
7.16	Planview of Feature 294 .....	7-15
7.17	Planview of Feature 229 .....	7-16
7.18	Location of All Basin Features by Type .....	7-17
7.19	Location of All Large Basin Features (B1).....	7-18
7.20	Planview of Feature 2 .....	7-19
7.21	Planview of Feature 90 .....	7-20
7.22	Profile of Feature 90 .....	7-20
7.23	Planview of Feature 78 .....	7-21
7.24	Planview of Feature 297 .....	7-22
7.25	Planview of Feature 232 .....	7-23
7.26	Planview of Feature 265 .....	7-24
7.27	Planview of Feature 129 .....	7-25
7.28	Planview of Feature 275 .....	7-26
7.29	Planview of Feature 278 .....	7-26
7.30	Profile of Feature 278 .....	7-27
7.31	Planview of Feature 260 .....	7-27
7.32	Location of All Small Basin Features (B3).....	7-28
7.33	Planview of Feature 37 .....	7-29
7.34	Planview of Feature 120 .....	7-30
7.35	Profile of Feature 120 .....	7-30
7.36	Planview of Feature 137 .....	7-31
7.37	Profile of Feature 137 .....	7-31
7.38	Planview of Features 202, 203 and 204.....	7-32
7.39	Planview of Feature 4 .....	7-32
7.40	Profile of Feature 4 .....	7-33
7.41	Location of All Surface Features (C).....	7-35
7.42	Location of All Biotic Features .....	7-36
7.43	Location of All Geomorphic and Undetermined Features (E and F).....	7-38
7.44	Features Identified in Hunter Research Backhoe Strip.....	7-39
8.1	Modern Botanical Environment Survey Transect.....	8-2
8.2	Modern Tree Species by Zone .....	8-3
8.3	Amplified Gradient Showing Dominant Tree Species by Zone .....	8-7
8.4	Comparison of Wood Charcoal Between TAS and Basin Features .....	8-18
8.5	Comparison of Nut Remains Between TAS and Basin Features.....	8-18
8.6	Comparison of Non-Carbonized Seeds Between TAS and Basin Features.....	8-19
9.1	Drawings of Feature 169 and Offset Sediment Column.....	9-2
9.2	Geoarchaeology Data Profile of Feature 77.....	9-3
9.3	Drawing of Feature 46 Profile .....	9-4
9.4	Geoarchaeology Data Profile of Feature 46.....	9-4

9.5	Contour Maps Showing the Distribution of Organic Matter in the E-horizon of the A-Block.....	9-10
9.6	Contour Map Comparing the Distribution of Calcined Bone to P Concentrations in the A-Block.....	9-11
9.7	Histograms Showing the Relationships Between Organic Matter and Texture .....	9-13
9.8	Scatter Diagrams and Histograms Showing the Relationships of Fe, Ca, and P .....	9-14
9.9	Contour Map Showing the Distribution of Ca in the E-horizon of the A-Block.....	9-21
9.10	Geoarchaeology Profile of Feature 2 and Three Other Nearby Columns Along the N370 Grid Line .....	9-22
9.11	Geoarchaeology Data Profile of Feature 38.....	9-23
9.12	Geoarchaeology Data Profile of Feature 60.....	9-24
9.13	Geoarchaeology Profile of Feature 90 and an Adjacent Offset Column .....	9-25
9.14	Geoarchaeology Data Profiles of Feature 169 and Offset Sediment Column .....	9-26
9.15	Series of Frequency Histograms that Depict the Variability in Abundances of P within Various Grouping of Data Types.....	9-28
10.1	Proposed Taphonomy of Delmarva Pithouse Features .....	10-3
10.2	Eight Variations of Tree Throws and Associated Stratigraphies .....	10-6
10.3	Typical Planview and Profile of Tree Throws .....	10-7
10.4	Pit/Mound Tree Fall Profile .....	10-9
10.5	Complete Inversion Tree Fall Profile .....	10-10
10.6	“Armor/Lag” Deposit Tree Fall .....	10-11
10.7	Tree Fall Mound Showing B-horizon Core Sediments .....	10-11
10.8	Infilling of Decaying Root Channels .....	10-12
10.9	Tree Bisection BX 2.....	10-16
10.10	Tree Bisection BX 4.....	10-16
10.11	Tree Bisection BX 6.....	10-17
10.12	Tree Bisection BX 9.....	10-17
10.13	Tree Bisection BX 10.....	10-19
10.14	Tree Bisection BX 12.....	10-20
10.15	Tree Bisection BX 14.....	10-20
10.16	Tree Bisection BX 15.....	10-21
10.17	Hickory Bluff BX 16 Profile.....	10-22
10.18	Hickory Bluff BX 1 Excavated Planview .....	10-23
10.19	Tree Bisection BX 8.....	10-24
10.20	BX 5 Stump and Depression.....	10-25
10.21	BX 17 Stump and Depression.....	10-26
10.22	Hickory Bluff BX 3 Profile.....	10-26
10.23	Tree Bisection BX 7.....	10-27
10.24	Hickory Bluff BX 18 Profile.....	10-28
10.25	Puncheon Run Site Downed Tree.....	10-29
10.26	Puncheon Run Tree Throw #2 .....	10-29
10.27	Puncheon Run Tree Throw #3 .....	10-30
10.28	Sandom Branch Tree Throw .....	10-31
10.29	Tree Stump Removal at Hickory Bluff Illustrating the Root Ball .....	10-32
10.30	Tree Stump Removal at Hickory Bluff Showing the Fine Diameter Roots .....	10-33

10.31	Experimental Feature Degradation Study Area Prior to Excavation, Looking East....	10-34
10.32	Experimental Feature Degradation Study Area Post-Excavation, Looking West .....	10-34
10.33	Experimental Feature Degradation Study Area Plan .....	10-35
10.34	Experimental Feature Degradation Study, Placing Datum at XF 8 .....	10-35
10.35	Large Bi-level Feature XF 1 .....	10-36
10.36	Deep Circular Basin XF 2 .....	10-36
10.37	Shallow Bowl-shaped Basin XF 7 .....	10-36
10.38	Experimental Feature Degradation Study In Progress, 1998.....	10-38
10.39	Experimental Feature Degradation Study In Progress, 2000, Looking East .....	10-38
10.40	Daily Temperature 1998 .....	10-39
10.41	Daily Precipitation 1998 .....	10-40
10.42	Rate of Infilling Compared to Monthly Precipitation and Temperature for XF 1 .....	10-41
10.43	Morphological Comparisons for XF 1 over the Course of the Observation Period ...	10-42
10.44	Rate of Infilling Compared to Monthly Precipitation and Temperature for XF 2 and XF 6 .....	10-43
10.45	Morphological Comparisons for Deep Conical Basins (XF 2 and XF 6) over the Course of the Observation Period.....	10-44
10.46	Rate of Infilling Compared to Monthly Precipitation and Temperature for XF 3 and XF 7 .....	10-45
10.47	Morphological Comparisons for Shallow Bowl-shaped Basins over the Course of the Observation Period .....	10-46
10.48	Rate of Subsidence Compared to Monthly Precipitation and Temperature for XF 4 and XF 5 .....	10-46
10.49	"As Excavated" and Surface Profiles of Backfilled Basins .....	10-47
10.50	Rate of Infilling Compared to Monthly Precipitation and Temperature for XF 8 .....	10-50
10.51	Morphological Comparisons for XF 8 over the Course of the Observation Period ...	10-51
10.52	Geomorphological Observations- Drying and Cracking .....	10-54
10.53	Geomorphological Observations - Smoothing from Rainfall.....	10-54
10.54	Hydrological Observations - Standing Water in XF 1.....	10-55
10.55	Hydrological and Floralturbation Observations - Standing Water and Floral Debris in XF 8 .....	10-55
10.56	Floralturbation Observations - Plant Growth in and around XF 7 in April 1998.....	10-56
10.57	Floralturbation Observations - Plant Growth in and around XF 7 in August 1998 ...	10-56
10.58	Faunalturbation Observations - Remains of Frog and Rat Snake in XF 1 .....	10-57
10.59	Sample Initial Contour Planview for Basin Features.....	10-59
10.60	Sample Grid Coordinate Contour Planview for Basin Features .....	10-60
10.61	Employing the Use of "Drawing Squares" at Hickory Bluff.....	10-61
10.62	SURFER® Generated Topographic Contour Map of Feature 78.....	10-62
10.63	Final Excavation Photograph and SURFER® Generated Topographic Contour Map of Feature 90 .....	10-63
10.64	SURFER® Generated Topographic Contour Map of Features 116 and 118 .....	10-64
10.65	SURFER® Generated Topographic Contour Map of Feature 169.....	10-65
10.66	SURFER® Generated Topographic Contour Map of Feature 137.....	10-65
10.67	SURFER® Generated Topographic Contour Map of Feature 120.....	10-66
10.68	SURFER® Generated Topographic Contour Map of Feature 232.....	10-66
10.69	SURFER® Generated Topographic Contour Map of BX 1 .....	10-67

10.70	SURFER® Generated Topographic Contour Map of BX 3 .....	10-67
10.71	SURFER® Generated Topographic Contour Map of BX 7 .....	10-68
10.72	SURFER® Generated Topographic Contour Map of Feature 56 Demonstrating 2.5 cm Contour Intervals.....	10-69
10.73	SURFER® Generated Topographic Contour Map of Feature 56 Demonstrating 5 cm Contour Intervals.....	10-69
10.74	SURFER® Generated Topographic Contour Map of Feature 90 with Piece Plotted Artifacts .....	10-70
10.75	Basin Feature Formation Scenario #1 Cultural Formation: Single Episode Excavation.....	10-75
10.76	Basin Feature Formation Scenario #2 Cultural Formation: Multiple Episode Excavation.....	10-76
10.77	Basin Feature Formation Scenario #3 Cultural and Natural Formation: Intruded by Natural Disturbances .....	10-78
10.78	Basin Feature Formation Scenario #4 Cultural and Natural Formation: Cultural Modification of Natural Disturbance .....	10-79
10.79	Basin Feature Formation Scenario #5 Cultural Utilization of a Natural Disturbance .....	10-81
10.80	Basin Feature Formation Scenario #6 Natural Formation .....	10-82
10.81	Basin Feature Formation Scenario #7 Cultural Formation .....	10-84
10.82	GIS Generated Planview with Artifact Content of Feature 90 .....	10-93
10.83	GIS Generated Planview with Artifact Content of Feature 118 .....	10-93
10.84	GIS Generated Planview with Artifact Content of Feature 120 .....	10-94
10.85	GIS Generated Planview with Artifact Content of Feature 3 .....	10-95
10.86	GIS Generated Planview with Artifact Content of Feature 234 .....	10-95
10.87	GIS Generated Planview with Artifact Content of Feature 139 .....	10-96
10.88	GIS Generated Planview with Artifact Content of Feature 298 .....	10-96
10.89	GIS Generated Planview with Artifact Content of Feature 63 .....	10-97
10.90	GIS Generated Planview with Artifact Content of Feature 119 .....	10-97
10.91	GIS Generated Planview with Artifact Content of Feature 202 .....	10-98
10.92	Schematic of the Hexagonal Tree Planting Pattern for an Orchard, circa 1913 .....	10-102
10.93	926 Army Air Corp Aerial Photograph depicting the Apple Orchard at Hickory Bluff.....	10-103
10.94	1937 DelDOT Aerial Photograph illustrating Expansion of the Apple Orchard at Hickory Bluff.....	10-103
10.95	Orchard Grid Overlay on Hickory Bluff Basin Features .....	10-105
11.1	Sweat Lodge Layout, October 25, 1998 .....	11-9
11.2	Sweat Lodge Basin, Feature S1, Lined with Mostly Whole Local Cobbles.....	11-10
11.3	The Sweat Lodge Framework and Sweat Lodge Basin, Feature S1 .....	11-10
11.4	Sweat Lodge Ceremonial Fire Basin, Feature S3, after Extinguishment Showing Fractured Stone, Charcoal and Dense Ash Residue.....	11-11
11.5	Sweat Lodge Ceremonial Fire Basin, Feature S3, Showing Fractured Stone and Sediment Staining.....	11-11
11.6	Sweat Lodge Cooking Hearth, Feature S6, Showing TAS, Charcoal and Remnant Meal Debris .....	11-12

11.7	Sweat Lodge Remnant Cobble Cluster, Feature S7, After Ceremony.....	11-13
11.8	Planview of Sweat Lodge Layout after One-time Ceremony Use.....	11-14
11.9	Profile of Sweat Lodge Features after One-time Ceremony Use .....	11-15
11.10	TAS Feature Formation Scenario #1, Size Sorted TAS Features.....	11-19
11.11	TAS Feature Formation Scenario #2, Material Type Selected TAS Features.....	11-21
11.12	TAS Feature Formation Scenario #3, Non-Specific Size or Material Sorting TAS Features.....	11-23
11.13	TAS Features Formation Scenario #4, Multi-Tiered TAS Features.....	11-25
11.14	TAS Feature Formation Scenario #5, Stones set in a Small Shallow Basin TAS Feature.....	11-27
11.15	TAS Feature Formation Scenario #6, Low Density Surface Manifestation of TAS Features.....	11-29
11.16	Planview of Feature 46 .....	11-35
11.17	Planview of Feature 55 .....	11-36
11.18	Planview of Feature 62 .....	11-37
11.19	Planview of Feature 87 .....	11-37
11.20	Planviews and Profile of Feature 98.....	11-38
11.21	Planview of Feature 136 .....	11-39
11.22	Planview of Feature 158 .....	11-40
11.23	Planview of Feature 173 .....	11-40
11.24	Planview of Feature 174 .....	11-41
11.25	Planview of Feature 175 .....	11-42
11.26	Planview of Feature 176 .....	11-43
11.27	Planview of Feature 194 .....	11-43
11.28	Planview of Feature 227 .....	11-44
11.29	Planview of Feature 230 .....	11-44
11.30	Planview of Feature 296 .....	11-45
11.31	Selected TAS Features - Material Types .....	11-47
11.32	Comparison of Material Type Percentage by Stone Lot.....	11-48
11.33	Comparison of Quartz/Quartzite to All Other Materials by Stone Lot.....	11-49
11.34	Comparison of TAS and Unaltered Fragments By Feature (Based on Frequencies).....	11-51
11.35	Comparison of Heat Alteration Type and Material within TAS Features.....	11-53
11.36	Comparison of Heat Alteration by Feature (Based on Frequencies).....	11-55
11.37	Comparison of Net Change in Percentage of Fragments Reddened.....	11-56
11.38	Comparison of Net Change in Percentage of Fragments Crazed .....	11-57
11.39	Comparison of Net Change in Percent of Fragments Pot-lidded .....	11-58
11.40	Comparison of Frequency and Weights of Fragments within TAS Features.....	11-59
11.41	Comparison of Mean Weight and Net Change for TAS Features .....	11-60
11.42	Ratio of Fracture Percentage to Total Count of TAS Features.....	11-61
11.43	Comparison of Net Change of Fracture Percentage within TAS Features .....	11-62
11.44	Comparison of Refit Percentages - All Refit Types .....	11-63
11.45	Comparison of Net Change of Total Refit Percentage .....	11-65
11.46	Comparison of Percentage of Percent-Completeness for TAS Features .....	11-66
11.47	Features 158 and 176 Showing Processed Stones and Presorted Stones.....	11-70
11.48	Artifactual Components of Feature 173 (Quartzite boulder).....	11-71

12.1	Palmer .....	12-7
12.2	Jack's Reef .....	12-7
12.3	Normanskill .....	12-8
12.4	Brewerton .....	12-9
12.5	Meadowood .....	12-10
12.6	Selby Bay .....	12-10
12.7	Woodland I Side-notched .....	12-11
12.8	LeCroy .....	12-13
12.9	Savannah River .....	12-14
12.10	Lackawaxen Straight Stemmed .....	12-15
12.11	Bare Island .....	12-16
12.12	Woodland I Stemmed .....	12-17
12.13	Adena .....	12-18
12.14	Susquehanna .....	12-19
12.15	Lackawaxen Expanding Stemmed .....	12-20
12.16	Fox Creek .....	12-21
12.17	Koens-Crispin .....	12-22
12.18	Poplar Island .....	12-23
12.19	Lackawaxen Contracting Stemmed .....	12-24
12.20	Rossville .....	12-25
12.21	Teardrop .....	12-26
12.22	Levanna .....	12-27
12.23	Examples of Early Stage Bifaces .....	12-32
12.24	Examples of Late Stage Bifaces .....	12-33
12.25	Examples of Ovoid Unifaces .....	12-36
12.26	Circular Unifaces .....	12-37
12.27	Examples of Pointed Unifaces .....	12-37
12.28	Examples of Retouched Flake Tools .....	12-38
12.29	Examples of Utilized Flake Tools .....	12-40
12.30	Examples of Hammerstones .....	12-45
12.31	Examples of Abraders .....	12-47
12.32	Examples of Single Pitted Stones .....	12-48
12.33	Examples of Double Pitted Stones .....	12-49
12.34	Pestles .....	12-50
12.35	Mortar .....	12-51
12.36	Celts .....	12-52
12.37	Gorget (2376-1) .....	12-53
12.38	Gorget (2377-1) .....	12-53
12.39	Ulu .....	12-55
12.40	Ceramic Types Identified within the Hickory Bluff Assemblage .....	12-59
12.41	Range of Variation of Ceramics from the Marcey Creek site, Virginia .....	12-62
12.42	Mat Impressions on Base of Sherd, Marcey Creek site, Virginia .....	12-63
12.43	Rim Sherd, Marcey Creek site, Virginia .....	12-64
12.44	Marcey Creek, Vessel Lot MA01 .....	12-65
12.45	Dames Quarter Sample (from the Delaware SHPO) .....	12-69

12.46	Dames Quarter, Vessel Lot HD1 .....	12-70
12.47	Wolfe Neck, Vessel Lot W3 .....	12-72
12.48	Popes Creek, Vessel Lot P1 .....	12-74
12.49	Ceramic Core Section, Coulbourn site, Delaware .....	12-75
12.50	Clay Tempered Ceramic, Wolfe Neck site, Delaware.....	12-76
12.51	Clay Tempered ware, cord-marked, Coulbourn site, Delaware.....	12-76
12.52	Clay Tempered ware, net-impressed, Coulbourn site, Delaware.....	12-77
12.53	Clay Tempered, Vessel Lot HCC4 .....	12-84
12.54	Rim Treatment, Vessel Lot CN06 .....	12-86
12.55	Mockley, Vessel Lot MO4.....	12-93
12.56	Hell Island, Vessel Lot H4.....	12-96
12.57	Townsend, Vessel Lot T1 .....	12-98
12.58	Minguannan, Vessel Lot MI1 .....	12-100

A.8	Distribution Map of Delaware Fruit Farms in 1936 .....	A-9
A.9	A 1937 DelDOT Aerial Photograph Illustrating the Size of the Richter Orchard .....	A-9
A.10	The Entire Richter Fruit Farm on a 1937 Aerial Photograph .....	A-10

---

A.11	Aerial photograph from 1937 (DelDOT) with Landmark Features around the Site.....	A-15
A.12	Hickory Bluff Site Map with the Edge of the Orchard and Orchard/Pasture Road.....	A-16
A.13	Schematic of the Hexagonal Tree Planting Pattern for an Orchard Circa 1913 .....	A-18
A.14	The Richter Orchard in a Rare 1926 Army Air Corp Aerial Photograph.....	A-19
A.15	1937 Aerial Photograph (DelDOT) Showing Extent of Orchard West of Highway 113.....	A-19
A.16	1995 Aerial Photograph of the Orchard, Just Prior to Demolition .....	A-20

## LIST OF TABLES

1.1	Summary of Early Investigations at Hickory Bluff .....	1-7
1.2	Summary of Phase III Investigations at Hickory Bluff .....	1-13
3.1	Professional Venues for Presentations about Hickory Bluff .....	3-26
5.1	Subsistence Model for Delmarva Native Groups .....	5-16
6.1	Radiocarbon Dates for Hickory Bluff.....	6-9
7.1	Previous Feature Typologies for Native American Sites in Delaware .....	7-2
7.2	Hickory Bluff Feature Typology .....	7-3
7.3	Type A1 Feature Subtypes.....	7-4
7.4	Type B1 Feature Subtypes at Hickory Bluff.....	7-18
7.5	Type B3 Feature Subtypes at Hickory Bluff.....	7-28
8.1	Plant Species Identified at Hickory Bluff.....	8-4
8.2	Species Identification for Wood Charcoal Recovered from Selected Hickory Bluff Features.....	8-11
8.3	Species Identification for Nut Remains and Carbonized Seed Recovered From Selected Hickory Bluff Features.....	8-13
8.4	Species Identification for Non-Carbonized Seed Remains from Selected Hickory Bluff Features.....	8-15
8.5	Other Plant Remains Recovered from Selected Hickory Bluff Features.....	8-17
8.6	Vertebrate Taxa Represented by Archaeofaunal Remains from Hickory Bluff.....	8-21
8.7	Species Identification of Non-Calcined Bone from Hickory Bluff .....	8-22
8.8	Species Identification of Calcined Bone from Hickory Bluff .....	8-23
9.1	Descriptive Statistics and Component Matrix from Principal Component Analysis for All Geoarchaeological Samples .....	9-6
9.2	Correlation Matrix for Variables Used in the Factor Analysis of Geoarchaeological Samples.....	9-8
9.3	Statistical Data of Texture and OM Content of Soil Horizons Compared with Cultural Features.....	9-12
10.1	Experimental Feature Parameters .....	10-37
10.2	Qualitative Observations on Experimental Features.....	10-52
10.3	Experimental Feature Depth Comparisons .....	10-58
10.4	Selected Basin Features by Type .....	10-85
10.5	Tabulation of the Features, Areas, Volumes and Artifact Densities.....	10-92
10.6	Summary of Basin Feature Attributes.....	10-99
10.7	Hickory Bluff Features Located in the Plowed Area of the North Backhoe Strip ....	10-104
11.1	TAS Features Selected by Type.....	11-33
11.2	Summary of Hickory Bluff TAS Refit Program.....	11-46
11.3	Detailed Analysis of TAS Features (Material Type and Heat Type).....	11-52

11.4	Detailed Analysis of TAS Features (Heat Type) .....	11-54
12.1	Data Categories Recorded in the Hickory Bluff Artifact Database .....	12-1
12.2	Total Artifact Assemblage for Hickory Bluff .....	12-2
12.3	Frequency of Fine Screen Artifacts from Selected Features .....	12-3
12.4	Stone Artifact Assemblage .....	12-4
12.5	Attributes Recorded on Projectile Points .....	12-5
12.6	Projectile Point Types .....	12-6
12.7	Hickory Bluff Brewerton Point Dimensions .....	12-9
12.8	Hickory Bluff Selby Bay Point Dimensions .....	12-10
12.9	Hickory Bluff Woodland I Side-notched Point Dimensions .....	12-11
12.10	Hickory Bluff Lackawaxen Straight Stemmed Point Dimensions .....	12-15
12.11	Hickory Bluff Bare Island Point Dimensions .....	12-16
12.12	Hickory Bluff Woodland I Stemmed Point Dimensions .....	12-17
12.13	Hickory Bluff Adena Point Dimensions .....	12-18
12.14	Hickory Bluff Susquehanna Point Dimensions .....	12-19
12.15	Hickory Bluff Lackawaxen Expanding Stemmed Point Dimensions .....	12-20
12.16	Hickory Bluff Koens Crispin Point Dimensions .....	12-22
12.17	Hickory Bluff Poplar Island Point Dimensions .....	12-23
12.18	Hickory Bluff Lackawaxen Contracting Stemmed Point Dimensions .....	12-24
12.19	Hickory Bluff Rossville Point Dimensions .....	12-25
12.20	Hickory Bluff Teardrop Point Dimensions .....	12-26
12.21	Chipped Stone Assemblage Material Types .....	12-31
12.22	Biface Stages and Lithic Material Use .....	12-33
12.23	Biface Stages and Presence of Cobble Cortex .....	12-34
12.24	Biface Stages and Use Wear .....	12-34
12.25	Uniface Use Wear .....	12-35
12.26	Ovoid Uniface Dimensions .....	12-36
12.27	Circular Uniface Dimensions .....	12-37
12.28	Pointed Uniface Dimensions .....	12-38
12.29	Retouched Flake Tool Use Wear .....	12-39
12.30	Utilized Flake Tool Use Wear .....	12-40
12.31	Cores and Lithic Material Types .....	12-41
12.32	Multidirectional Cores and Size Grades .....	12-41
12.33	Bipolar Cores and Size Grades .....	12-42
12.34	Debitage Frequencies .....	12-42
12.35	Flake Size and Lithic Material Type .....	12-43
12.36	Chip Size and Lithic Material Type .....	12-43
12.37	Cobble Tool Type and Frequency .....	12-44
12.38	Cobble Tool Material Types .....	12-45
12.39	Whole Hammerstone Weights (gm) .....	12-46
12.40	Hammerstone Use Wear .....	12-46
12.41	Whole Abrader Weights (gm) .....	12-46
12.42	Abrader Use Wear .....	12-47
12.43	Pitted Stone Use Wear .....	12-48
12.44	Other Artifact Types .....	12-57

12.45	Ceramic Assemblage .....	12-59
12.46	Marcey Creek Ceramics.....	12-64
12.47	Dames Quarter Ceramics .....	12-69
12.48	Wolfe Neck Ceramics.....	12-71
12.49	Popes Creek Ceramics .....	12-74
12.50	Clay Tempered Ceramics.....	12-78
12.51	Mockley Ceramics .....	12-91
12.52	Hell Island Ceramics.....	12-95
12.53	Townsend Ceramics.....	12-97
12.54	Minguannan Ceramics .....	12-99
12.55	Untyped Ceramics.....	12-101
13.1	Gravel Sample Summary .....	13-4
13.2	Percent by Weight According to Wentworth Scale .....	13-5
13.3	Lithological Frequency by Sample .....	13-8
13.4	Lithological Distribution by Size Interval .....	13-10
13.5	Percentages of Lithic Material Types for Local Gravels, Bifaces and Cores.....	13-15
13.6	Mean Flake Weight by Size Grade for Selected Hickory Bluff Material Types .....	13-20
13.7	Percentage of Remnant Cortex and Flake/Chip Ratio for Hickory Bluff Debitage ....	13-21
13.8	Lithic Raw Material Distribution among Points in the Hickory Bluff Collection.....	13-22
13.9	Raw Material Proportions among Selected Haft Types, Grouped by Length .....	13-26
13.10	Raw Material Proportions among Selected Haft Types, Grouped by Width.....	13-27
13.11	Pair-Wise Comparison of Width:Thickness Ratios for Selected Raw Material Types.....	13-30
13.12	Frequency of Occurrence of Lithic Raw Materials among Gravels and Points .....	13-31
13.13	Variation in Mean Lengths of Gravels and Points.....	13-34
13.14	Variation in Mean Widths of Gravels and Points .....	13-35
13.15	Frequency Distribution of Bifaces, Points and Gravels.....	13-35
13.16	Variation in Mean Lengths of Gravels, Points and Bifaces.....	13-36
13.17	Variation in Mean Widths of Gravels, Points and Bifaces .....	13-36
13.18	Variation in Haft Length and Tip Angle Proportion for Large and Small Points.....	13-56
13.19	Variation in Blade Shape and Tip Angle Proportion for Large and Small Points.....	13-56
13.20	Edge Damage and Alternate Beveling for Selected Projectile Points .....	13-58
13.21	Use Wear on Selected Projectile Points.....	13-58
13.22	Edge Angles and Probable Tool Function .....	13-60
13.23	Use Wear Patterning and Suggested Activity .....	13-61
13.24	Biface Tool Edges with Use Wear from Hickory Bluff .....	13-63
13.25	Biface Edge Angles and Possible Function Based on Use Wear.....	13-64
13.26	Uniface Primary Edge Angles and Retouch Type .....	13-65
13.27	Uniface Primary Edge Angles and Possible Function Based on Use Wear .....	13-66
13.28	Uniface Hafting Edge Angles and Retouch Type.....	13-67
13.29	Uniface Hafting Edge Angles and Use Wear .....	13-67
13.30	Awl/Punch Tool Edges from Hickory Bluff.....	13-69
13.31	Chopping Tool Edges from Hickory Bluff.....	13-71
13.32	Concave Scraping Tool Edges from Hickory Bluff.....	13-71
13.33	Drill Tool Edges from Hickory Bluff .....	13-73

13.34	Graving Point Tool Edges from Hickory Bluff .....	13-75
13.35	Retouch Flake Edge Angles and Retouch Type .....	13-76
13.36	Retouched Flake Edge Angles and Possible Function Based on Use Wear .....	13-77
13.37	Utilized Flake Edge Angles and Possible Function Based on Use Wear .....	13-78
13.38	Battered Surfaces on Hickory Bluff Cobble Tools .....	13-79
13.39	Fractured Ends on Hickory Bluff Cobble Tools .....	13-82
13.40	Hickory Bluff Cobble Tools with Perimeter Battering .....	13-83
13.41	Abrading Surfaces on Hickory Bluff Cobble Tools .....	13-84
13.42	Pitted Surfaces on Hickory Bluff Cobble Tools .....	13-85
13.43	Descriptive Statistics for Pitted Recesses .....	13-88
13.44	Pestles at Hickory Bluff .....	13-90
13.45	Summary of Residue and Use Wear Analysis on Fifty Selected Unifacial Tools.....	13-92
13.46	Frequency of Use Wear and Residue Evidence for Hafting and Use on Fifty Selected Unifacial Tools .....	13-105
13.47	Summary Data from Unifacial Tool Edge Analyses .....	13-106
13.48	Hafting Indicators on Selected Unifacial Tools .....	13-107
13.49	Summary of Use Action for Selected Unifacial Tools .....	13-107
13.50	Summary of Function for Selected Unifacial Tools .....	13-108
13.51	Artifact type and Frequency in the Mineralogy Study .....	13-109
13.52	Geological Formations Associated with the Hickory Bluff Assemblage .....	13-110
13.53	Hickory Bluff Projectile Point Lithic Sources .....	13-111
13.54	Hickory Bluff Biface Lithic Sources .....	13-113
13.55	Hickory Bluff Uniface Lithic Sources .....	13-114
13.56	Lithic Source Locations and Temporally Diagnostic Projectile Points .....	13-116
14.1	Hickory Bluff Ceramic and Cordage Types .....	14-8
14.2	Vessel Function Attributes and Possible Function .....	14-19
14.3	Thin Section Analysis by Ceramic Type .....	14-22
14.4	Results of Thin Section Analysis .....	14-24
14.5	Comparison of Ceramic Matrices .....	14-56
14.6	Summary of Vessel Lot Attributes for Marcey Creek .....	14-60
14.7	Summary of Vessel Lot Attributes for Dames Quarter .....	14-63
14.8	Summary of Vessel Lot Attributes for Wolfe Neck .....	14-65
14.9	Summary of Vessel Lot Attributes for Popes Creek .....	14-66
14.10	Summary of Vessel Lot Attributes for Clay Tempered, Cord Marked .....	14-68
14.11	Summary of Vessel Lot Attributes for Clay Tempered, Net Impressed .....	14-71
14.12	Summary of Vessel Lot Attributes for Mockley .....	14-79
14.13	Summary of Vessel Lot Attributes for Hell Island .....	14-83
14.14	Summary of Vessel Lot Attributes for Townsend .....	14-85
14.15	Summary of Vessel Lot Attributes for Minguannan .....	14-87
14.16	Summary of Vessel Lot Attributes for Untyped Wares .....	14-88
15.1	Color Definitions for Selected Hickory Bluff Artifacts .....	15-1
15.2	Color Data for the Hickory Bluff Projectile Points .....	15-2
15.3	Color Analysis for the Hickory Bluff Projectile Points .....	15-3
15.4	Color Analysis for the Temporally Diagnostic Projectile Points .....	15-3

15.5	Color Data for Selected Ceramic Lots at Hickory Bluff.....	15-4
15.6	Color Analysis for Selected Ceramic Lots.....	15-5
15.7	Color Data for Specialized Features and Artifacts from Hickory Bluff.....	15-5
15.8	Color Analysis for Specialized Features and Artifacts.....	15-6
15.9	Color Data for Selected TAS Features from Hickory Bluff.....	15-6
15.10	Color Analysis for the Selected TAS Features .....	15-7
16.1	Locus A Block 1, Lithic Cluster, Debitage Size Grade Breakdown.....	16-17
16.2	Summary of Diagnostic Projectile Points from Locus A Block 1 .....	16-27
16.3	Debitage Size Grade Breakdown for the Jasper Cluster in N316-317 E676 .....	16-34
16.4	Summary of Diagnostic Projectile Points from Locus A Block 2.....	16-42
16.5	Size Grade Breakdown of Rhyolite Debitage in Northwest Main Block Cluster.....	16-72
16.6	Size Grade Breakdown of Quartz Debitage in Locus H Part 1 Cluster.....	16-74
16.7	Summary of Quartz Projectile Points in Proximity to Locus H Block 1 Quartz Cluster.....	16-75
16.8	Summary of Jasper Projectile Points in Proximity to Locus H Block 1 Jasper Cluster.....	16-76
16.9	Size Grade Breakdown of Jasper Debitage in Locus H Block 1 Cluster .....	16-77
16.10	Size Grade Breakdown of Jasper Debitage in Locus G Part 3 Jasper Cluster 1.....	16-79
16.11	Size Grade Breakdown of Jasper Debitage in Locus G Part 3 Jasper Cluster 2.....	16-79
16.12	Summary of Jasper Projectile Points in Proximity to Locus G Part 3 Jasper Clusters .....	16-80
16.13	Size Grade Breakdown of the Northwest Jasper Cluster in Units N403-405 E622-23.....	16-120
16.14	Size Grade Breakdown of the Southwest Jasper Cluster in Units N399-401 E623 and N400 E624 .....	16-120
16.15	Summary of Jasper Projectile Points from the E-horizon in Locus I.....	16-121
16.16	Summary of Ironstone Artifacts by Universal Stratum.....	16-123
16.17	Size Grade Breakdown of Ironstone Debitage in Locus I.....	16-124
16.18	Size Grade Breakdown of Green Argillite Debitage in Locus I.....	16-125
17.1	Dates from Organic Residues on Ceramic Sherd Interiors .....	17-7
17.2	Feature Provenience Containing Diagnostic Artifact Associations in the Northwest Main Block.....	17-12
17.3	Summary of Chronological Associations from Hickory Bluff .....	17-16
18.1	Summary of Features, Artifacts and Diagnostics for Locus A Block 1.....	18-8
18.2	Summary of Features, Artifacts and Diagnostics for Locus A Block 2.....	18-14
18.3	Summary of Features, Artifacts and Diagnostics for Locus F.....	18-26
18.4	Summary of Features, Artifacts and Diagnostics for Locus G.....	18-26
18.5	Summary of Features, Artifacts and Diagnostics for Locus H Block 1.....	18-28
18.6	Summary of Features, Artifacts and Diagnostics for Locus H Block 2.....	18-34
18.7	Summary of Features, Artifacts and Diagnostics for Locus I.....	18-39
19.1	Middle Archaic Radiocarbon Dates, Middle Reaches of the St. Jones River.....	19-14
19.2	Late Archaic Radiocarbon Dates, Middle Reaches of the St. Jones River .....	19-15

19.3	Early Woodland Radiocarbon Dates, Middle Reaches of the St. Jones River .....	19-16
19.4	Middle Woodland Radiocarbon Dates, Middle Reaches of the St. Jones River.....	19-18
19.5	Late Woodland Radiocarbon Dates, Middle Reaches of the St. Jones River .....	19-20
19.6	Adena Radiocarbon Dates, Middle Reaches of the St. Jones River .....	19-26
20.1	Percentage of Selected Hickory Bluff Artifacts and Raw Material Source Location .....	20-2
20.2	Hickory Bluff Chipped Stone Artifact Assemblage- Raw Material Percentages by Artifact Types .....	20-4
20.3	Hickory Bluff Chipped Stone Artifact Assemblage- Cortex Percentages by Artifact Types .....	20-4
20.4	Percentage of Hickory Bluff Flake Size by Raw Material Type .....	20-5
20.5	Tool Edges/Surfaces Based on the Presence of Use Wear .....	20-6
20.6	Functional Categories Based on Tool Edge and Use Wear Analysis .....	20-7
20.7	Hickory Bluff Artifact Types and Cultural Behavior Based on Tool Edge and Use Wear Analysis.....	20-8
20.8	Percentage of General Tool Types for St. Jones Sites .....	20-9
20.9	St. Jones Ceramic Type Percentages .....	20-11
20.10	Hickory Bluff Ceramic Vessel Data .....	20-15
20.11	Comparison of Surface Treatment and Cordage Twist Direction .....	20-16
20.12	Cordage Twist Data .....	20-17
A.1	Land owners of the Hickory Bluff parcel, 1680-present .....	A-2
A.2	Historical Artifact Classification and Description.....	A-12
A.3	Temporal Distribution of Hickory Bluff Historical Artifacts by Century .....	A-12
A.4	Hickory Bluff Features with Historical Artifacts.....	A-13
