

Purpose of the Workshop

To present the West Dover Connector Project preliminary design plans and to inform the public about:

- Final design plans and details
- Next steps and project schedule

The final design was preceded by an Alternatives Analysis study and an Environmental Assessment (EA). The EA has been finalized and the project is nearing final NEPA (National Environmental Policy Act) clearance.

Actions to Date

- Created and met with a West Dover Connector Working Group
- Held five public workshops
- Developed and analyzed concepts and alternatives
- Narrowed list of alternatives and performed detailed study on five of the remaining alternatives
- Developed the state's preferred alternative
- Prepared draft Environmental Assessment (EA) and submitted it to FHWA
- Coordinated with landowners for final design details
- Developed preliminary design plans

Your comments and suggestions are very important to this project.
