

# PROJECT PURPOSE & NEED

- The purpose of this project is to maintain capacity of the SR 1 corridor and improve safety at the unsignalized intersection of SR 1 and Minos Conaway while improving mobility and access for local traffic.
- Proposed improvements include a grade separation (vertical separation) of the intersection of SR 1 and Minos Conaway Road and relocation further south to utilize the existing SR 1 Nassau Bridges over the decommissioned Delaware Coast Line Railroad.
- Access will be maintained to SR 1 and local neighborhoods via off-ramps, on-ramps, and service roads.
- A multi-use trail is proposed to connect Minos Conaway Road to the Georgetown-Lewes trail.

## PROJECT SCHEDULE

Design	-----	2018-2022
Right-of-Way Acquisition	-----	2019-2021
Construction	-----	2022-2024
