

Proposed Improvements

- Increase the left turn lengths on Marsh Road under I-95 from 160 ft to 300 ft.
- Add an additional left turn lane on EB Carr Road to NB Marsh Road.
- Widen the I-95 exit ramps to handle two lanes of traffic and increase the right turn lengths.
- Upgrade the traffic signals and improve phasing at the intersections of Marsh Road/Carr Road and Marsh Road and the I-95 Ramps.
- Install a new traffic signal at the northbound I-95 exit ramp at Carr Road.
- Improve existing pedestrian facilities to complete corridor connections; pedestrians will continue to use shoulders outside project limits.
- Install bike lanes and multi-use paths along Marsh Road; add bike lanes on Carr Road.
- Improve the lighting throughout the project area and add an additional crosswalk at the intersection of Carr Road and Marsh Road.
- Concrete pavement reconstruction and roadway resurfacing throughout project.
- Improve existing DART facilities on Marsh Road.
