DELAWARE DEPARTMENT OF TRANSPORTATION

US 301, MARYLAND STATE LINE TO SR1  
CONTRACTOR INFORMATIONAL MEETING

August 24, 2015  
10:00 a.m.

University of Delaware  
John M. Clayton Hall, Room 128  
100 David Hollowell Drive  
Newark, Delaware 19716

PRESENTERS:

DIANE GUNN - DelDOT US301 Project Manager  
ALAN MARTENEY - US301 GEC Team  
JAVIER TORRIJOS - DelDOT Assistant Director,  
Construction  
JIM HOAGLAND - DelDOT Contract Administration

PANEL MEMBERS:

KEVIN CALIO - Department of Labor  
ROB MCCLEARY - Department of Transportation,  
Chief Engineer and Director of  
Transportation Solutions  
SHANTE' HASTINGS - Department of  
Transportation, Deputy Director of  
Transportation Solutions  
RAMON CEBALLOS - Department of Transportation,  
DBE Coordinator  
CHRISTINE LEVELY - Department of  
Transportation, Audit Section

WILCOX & FETZER  
Registered Professional Reporters  
1330 King Street - Wilmington, Delaware 19801

**WILCOX & FETZER LTD**  
Registered Professional Reporters  
(302) 655-0477  
www.wilfet.com

1 MS. GUNN: Good morning, and  
2 welcome to the DelDOT US301 contractor  
3 information meeting. Today we have several  
4 presenters with us. My name is Diane Gunn.  
5 I'm the US301 project manager, and I'll be  
6 introducing you to the contractor website.

7 We also have Alan Marteney from  
8 Century Engineering. Alan will be presenting  
9 an overview of the contracts. Javier  
10 Torrijos, DelDOT Assistant Director of  
11 Construction. Javier will be explaining  
12 DelDOT's construction approach. And Jim  
13 Hoagland, the DelDOT contract administrator.  
14 Jim will be discussing contractual issues.

15 Also available for questions is  
16 Kevin Calio from Department of Labor; Rob  
17 McCleary, Chief Engineer and Director of  
18 Transportation Solutions; Shante' Hastings,  
19 Deputy Director of Transportation Solutions;  
20 Ramon Ceballos, DelDOT DBE Coordinator; and  
21 Christine Lively from DelDOT Audit.

22 After each presenter we'll give  
23 you a chance to ask questions, and we have  
24 some microphones for your use.

1 DelDOT's provided a contractor  
2 website. The site can be located at  
3 [www.us301.deldot.gov](http://www.us301.deldot.gov). That's right on your  
4 agendas. You go to the Contractor Information  
5 tab that's on the right.

6 The purpose of the contractor  
7 website is to assist potential contractors and  
8 suppliers in becoming familiar with the  
9 project. These are not contract documents,  
10 and it's not meant to be used as the bidding  
11 site. We'll cover the bid process a little  
12 bit later in the presentation.

13 Towards the bottom of the  
14 contractor website you will find general  
15 information as well as more detailed  
16 information about each contract.

17 Under general information you'll  
18 find documents, give you an introduction to  
19 the project, as well as a sample of a  
20 prequalification form. The contract limits  
21 map will help orient you on where the projects  
22 are. The transportation management plan is  
23 provided for your information.

24 And we'll talk more about the

1 prequalification form and the transportation  
2 management plan a little bit later in the  
3 presentation.

4 We also have the advertisement  
5 schedule. The tentative schedule of  
6 advertisement is listed. It gives the month  
7 that we expect to advertise. You'll notice in  
8 the first column that there's a US301 project  
9 reference. This is a shorter way for you to  
10 identify the contracts, and the project team  
11 has been using this. You'll find the project  
12 references are also in the contract limits  
13 map.

14 Through the contractor  
15 information website you have the ability to  
16 ask questions about general information or the  
17 individual contracts.

18 DelDOT will leave all the  
19 information on the contractor information  
20 website throughout advertisement, but the  
21 ability to ask questions through this website  
22 will stop approximately two weeks prior to the  
23 official bid advertisement. Responses to  
24 questions on the contractor information

1 website are not considered official.

2 We will have all the responses  
3 posted approximately one week prior to the  
4 official bid advertisement. Questions and  
5 official answers will be handled during the  
6 bid advertisement period based on information  
7 that is contained in the advertised bid  
8 proposal.

9 Going into the contracts, there's  
10 information under each of the contracts.  
11 We'll go into contract 1A. You'll see that  
12 this contract is scheduled to go to  
13 advertisement next Monday, August 31st. This  
14 contract does not have the question buttons  
15 because we're so close to advertisement. All  
16 the questions for this contract will go  
17 through the normal bidding website.

18 We have specifications up for the  
19 1A contract, but you will not find  
20 specifications on all the contracts. We've  
21 only put the information that we have  
22 available right now. There's also a plan  
23 marked roll plan on the website that you'll  
24 find helpful. It shows the whole contract on

1 one plan sheet.

2 If you click on the construction  
3 plans for 1A, you'll see that we have all the  
4 construction plans listed. You'll notice that  
5 all the information on the site is marked as  
6 draft and it's not to be used for bidding.

7 This is the end of this part of  
8 the presentation on the website. Does anybody  
9 have any questions before we go on to the  
10 project overview?

11 No? Okay. Next will be Al  
12 Marteney.

13 MR. MARTENEY: Thank you, Diane.

14 Good morning. What I'm going to  
15 present today is just a general overview of  
16 the project. I won't get into too many  
17 specifics since this isn't a mandatory prebid  
18 or anything. Just to kind of orient you to  
19 what the project involves, it's about 13 miles  
20 of a divided highway a lot like Route 1.

21 When we're finished with it there  
22 will be seven mainline contracts. As Diane  
23 mentioned before, it will all be under  
24 construction concurrently. There will be

1 three new full access interchanges, and then  
2 at the connection to Route 1 we only have the  
3 north serving ramps.

4 It involves a lot of excavation  
5 and embankment. It involves also a  
6 lightweight fill component at some locations  
7 because of the underlying utilities and other  
8 issues. 12-inch Portland cement pavement on  
9 the mainline and the ramps, that includes both  
10 the mainline and the shoulders.

11 We have a lot of bituminous  
12 concrete roads, pavement on the side roads.  
13 There will be steel and concrete girder  
14 bridges, a lot of MSE walls. We have PCC box  
15 culverts. We have arch culverts. We have  
16 emergency access ramps, crossovers.

17 Another aspect of this project is  
18 we'll only have AET, all electronic toll  
19 facilities, so we won't have big tollbooths or  
20 a large toll administration building on this  
21 job. Those AET facilities, we have one on the  
22 mainline and one on the north serving ramps at  
23 three full access interchanges. Those only  
24 involve gantries to support the AET and the

1     ORT facilities.

2                     There's lighting, signing, all  
3     the other stuff, utility relocations. Norfolk  
4     Southern is involved with two of the  
5     contracts. A lot of drainage and E&S,  
6     environmental mitigation, stream restoration,  
7     maintenance of traffic.

8                     And we have some limited  
9     landscaping in initial contracts. There's  
10    some in Contract 3, which is at the southern  
11    end that goes into Maryland because of the  
12    requirements of the Maryland stormwater  
13    management regulations and permits, but  
14    after -- not after. As we get towards the end  
15    of the construction we'll be getting two other  
16    separate contracts for landscaping that the  
17    mainline contractor will need to coordinate  
18    with.

19                    We've had extensive, extensive  
20    public involvement on this project to date.  
21    The contractor will be expected to participate  
22    in construction informational meetings  
23    throughout the contract duration. I will also  
24    be putting out updates via the website and

1 through email notices.

2 We need to point that all local  
3 ordinances will need to be followed including  
4 noise. Most of the project is in New Castle  
5 County, but we do have a small portion of the  
6 project that's within the Town of Middletown  
7 limits.

8 Permits. We have all of our  
9 permits. You can see there's a lot of them.  
10 Also the environmental compliance sheets, the  
11 environmental statements. There's just a lot  
12 of information in this contract that you need  
13 to read through with the project notes and all  
14 of the statements to make sure you understand  
15 all of the parameters that you have to  
16 function under.

17 There will be a separate  
18 environmental monitor as part of the  
19 inspection team to monitor the appropriate  
20 conditions. We also have an archaeologist on  
21 site, on board that will have some oversight  
22 of some of the excavations.

23 The erosion and sediment control,  
24 there will be a separate CCR firm employed to

1 go over that. There's very detailed  
2 construction phasing, MOT plans.

3 And also we need to point out  
4 that through the project development of the  
5 plans DelDOT issued this November 24, 2014  
6 supplemental specifications to the standards,  
7 which issued a new Division 900. So you need  
8 to make sure that you read and understand  
9 that. But all the references in the contract  
10 documents were not necessarily updated.

11 We did provide a table to give  
12 you a cross reference if we have a pay item  
13 from the old standards to what the new pay  
14 item is. And one of the big changes is  
15 sediment removal is not a separate pay item,  
16 but sends it down to the MSI that's being  
17 constructed or being installed.

18 We mentioned the CCR firm. If  
19 you haven't been involved with that in  
20 Delaware yet, it's a requirement. And any  
21 plan changes, we must have those approved  
22 before implementing. We have a lot of people  
23 that are available to work with you if you  
24 want to change the phasing or do something

1 else other than what's on the plans, but we  
2 have to have that approved and in the field  
3 office before we implement it.

4           There is a new pay item, Item  
5 No. 900500, an environmental performance  
6 incentive (disincentive). This is a fixed  
7 price per contract, lump sum. The payment  
8 that will be made to the contractor is based  
9 upon the ES2M inspection report ratings. So  
10 that pay item is in the 1A special provisions  
11 that is posted, so you want to understand  
12 what's going on with that. It's an  
13 opportunity to get incentive payments.

14           We are also implementing a new  
15 item, Item 900501, for borrow area erosion and  
16 sediment control and dewatering. This is  
17 applicable to some of the larger major borrow  
18 sources within the limits that are identified  
19 on the plans. The intent of that is that  
20 what's inside of these large borrow sources,  
21 you are responsible for any E&S measures.

22           What we're worried about is what  
23 comes out at the discharge end, and there's  
24 some turbidity monitoring and levels that are

1 defined in that pay item. We wanted to point  
2 out that the violation of the turbidity levels  
3 is considered a sediment discharge, and that  
4 goes back onto your ES2M inspection report  
5 ratings, which goes into the 900500 issues.

6 We also need to point out that  
7 stormwater management facilities, we have to  
8 have the CCR present when the certain elements  
9 are constructed. We need to have the advance  
10 schedule notice, and that schedule needs to be  
11 adhered to so we have the CCR person there.

12 The initial excavation of the  
13 infiltration facilities is generally to 2 feet  
14 above final grade, the excavation to final  
15 grade only after the contributing area is  
16 stabilized. So there's some staging there.

17 The excavation of stormwater  
18 management facilities on this project has been  
19 incorporated under the 202 excavation and  
20 embankment pay item. You don't have a  
21 separate pay item for stormwater management  
22 excavation. And don't forgot the as-builts.

23 As Diane mentioned, there is a  
24 traffic management plan that has been

1 prepared. It includes all seven of the  
2 contracts. It includes the information that  
3 was pulled out of the contract plans, public  
4 information and some management.

5 We'll be watching the schedules  
6 for overlapping detours when those are  
7 happening. And if you've dealt with a larger  
8 project with a TMP, you know that it's a  
9 living document that will have the TMP monitor  
10 on our staff and make changes as we need to.

11 Utility relocations, we've got a  
12 pretty good jump on those. We expect the  
13 majority of the ones that we can get done in  
14 advance to be completed either by the end of  
15 this year or early into -- or early to mid  
16 2016.

17 There are some utility  
18 relocations that are included in the mainline  
19 contracts as pay items. There's others that  
20 require work to be done by the road contractor  
21 before the utility relocations can occur, and  
22 so just read carefully the utility statement,  
23 what's going on with each contract.

24 The electronic files. This is

1 something that some of you have been very  
2 interested in. In addition to the files that  
3 are listed on the contract or the project  
4 notes, we will also be providing these 3D  
5 feature files in microstation.dgn format.  
6 That's for the top surface only.

7 The purpose of these is to use  
8 them for the machine grading control under the  
9 construction engineering item. And something  
10 new, we are looking to make these available  
11 during the bid period after you sign a release  
12 form. We don't have those ready now, but when  
13 the bids go to advertisement we will have a  
14 process in place so we can get those out to  
15 you if you want to look at them.

16 We have seven contracts. The  
17 contract 3, 1C, 1B, 2A, 1A, 2B, 1D is the  
18 vernacular we've been using, and it's a lot  
19 easier for everybody to reference those. The  
20 contract limits, all of these, they interface,  
21 they overlap. There's a lot of details in the  
22 phasing and details in the plans how all those  
23 contracts come together. There's also a  
24 separate toll integrator that DelDOT is going

1 be contracting for.

2           So in the prospective bidders  
3 notes there will be interim milestones  
4 identified for some of this overlapping work  
5 when one contractor has to have something done  
6 prior to the next contractor coming in and  
7 doing some other work. And I'll get into that  
8 a little bit more when I look at each one of  
9 the contracts.

10           But, again, just something, the  
11 prospective bidders notes, there could be a  
12 lot of information in those notes to look at  
13 also, and those are in the bid proposal form.

14           Contract 2A, which is in the  
15 middle of the project, we have set up that  
16 they will open up the entire facility. They  
17 will be responsible for taking over some of  
18 the MOT devices that have been placed under  
19 the other contracts for keeping traffic off of  
20 their completed sections of 301.

21           And then there's also work that  
22 has to get done, for instance, Contract 3, we  
23 expect it to be finished about six months  
24 ahead of when we're ready to open up 301, and

1 we'll have a temporary connector between new  
2 301 and existing Summit Bridge Road, and 2A  
3 will have to come back and remove that to get  
4 traffic up on the new facility.

5           The northern long-eared bat was  
6 just recently classified as threatened, which  
7 the resource agencies and permits, we can have  
8 no clearing of trees of the potential habitat  
9 between those dates. So DelDOT is looking to  
10 put out an advance clearing contract very soon  
11 to clear the areas this fall and through the  
12 winter before April of the areas of potential  
13 habitats.

14           These aren't individual trees.  
15 These are areas that are in more heavily  
16 wooded areas. That contractor will only  
17 perform clearing, cut the trees, and let them  
18 lay. Then the road contractor will be  
19 responsible for coming in, removing them, and  
20 properly disposing of them.

21           We'll have an advance clearing of  
22 any trees 3 inches in diameter across or  
23 greater. We'll leave it at a stump about 2 to  
24 4 feet high so that the road contractor can

1 come in and perform the grubbing that way.

2 As we're doing this advance  
3 contract, part of the permit conditions is we  
4 have a resource protection fence. It's  
5 basically the orange construction safety fence  
6 with a sign that says no trespassing beyond  
7 this.

8 We'll have some of that installed  
9 as part of the advance contract to make sure  
10 we don't go beyond the limits of what's been  
11 permitted, and we're looking to leave some of  
12 that up. The road contractor can take that  
13 over.

14 As I mentioned, the mainline  
15 pavement is going to be 12 inches of PCC  
16 pavement over 4 inches of PTB over 6 inches of  
17 soil cement over 12 inches of borrow, type A  
18 capping. Basically the same paving section  
19 that we had on the mainline for Route 1,  
20 except for 301, again, the concrete shoulders  
21 is included.

22 In cut areas we have done an  
23 extensive subgrade investigation, materials  
24 investigation. We see some of these areas

1 that were in excavation below subgrade will be  
2 eligible for acting as the type A capping.

3 We have an underdrain detail.  
4 The pavement joint layout details are also  
5 included, and there's an update to Section 501  
6 for the concrete pavers and the concrete  
7 pavement.

8 The paving details are a little  
9 different than what we have on Route 1. The  
10 typical joint spacing on 301 is going to be  
11 just 15 feet, and we're not sealing the  
12 joints. As we mentioned, the same pavement  
13 section is going to be used for ramps.

14 It's a fairly large earthwork  
15 job, over 5 million cubic yards total. The  
16 majority of the material is going to be  
17 obtained on site through these major borrow  
18 sources that we identified. There are grading  
19 plans and conditions for each one of the  
20 borrow sources on what can and can't be done  
21 within those limits, and there's lots of notes  
22 and parameters in the plans.

23 We have detailed earthwork  
24 summaries that break down the projects per

1 section and also per construction phase, and  
2 we are identifying some critical survey  
3 elements that we need to pick up during the  
4 construction so that we can track and account  
5 for the earthwork as it's going along. As we  
6 get closer to the end, we'll discuss that.

7 We have a large mitigation site  
8 that we have to excavate down to the bottom  
9 elevation and get the acreage out of. We have  
10 some flexibility on the side slopes, but  
11 that's all dependent upon what our final  
12 earthwork utilization is.

13 We have bridges at 24 location,  
14 everything from large pipes to box culverts  
15 and precast arch. We're widening the Route 1  
16 bridge over Scott Run. We have both steel and  
17 concrete girders. We have pile alternatives.  
18 The contractor is responsible for the dynamic  
19 pile testing and signal matching.

20 Again, in the prospective bidders  
21 notes there is a concrete shrinkage reducing  
22 and compensating admixture that is to be added  
23 to the concrete for the bridge superstructures  
24 and parapets and our roadway barriers. We

1 have MSE walls. Also some bridges have just  
2 the concrete wall abutments.

3 We also have an extensive  
4 settlement monitoring plan, requirements to go  
5 in, settlement devices to be installed by the  
6 road contractors, and we have a temporary  
7 surcharge at one location.

8 Now this is the video that's  
9 available on the website. I'll see if I can  
10 get it to run. What this is is an artist's  
11 representation prepared by RK&K. The line  
12 shows a representation of what the existing  
13 ground is. Then as we go along, the video  
14 shows what our final product will look like.

15 Here we're just coming north of  
16 the Maryland line. There's the weigh and  
17 inspection station. Strawberry Lane is down  
18 below there. Come along, Warwick Road is off  
19 to your left. We'll come up and we'll see the  
20 gantries for the mainline. AET toll facility  
21 as we're right there. Again, you see most of  
22 this is out on farmland and open territories.

23 We'll be coming up here where we  
24 have our South Middletown, also known as

1 Levels Road interchange. It's a full diamond  
2 interchange. And the north serving ramps, you  
3 see the gantries again for the AET facilities.

4 Along this area, we're coming  
5 north, you'll see a berm on the right-hand  
6 side as part of the public involvement and  
7 commitments that we've need them on Bunker  
8 Hill Road. It comes up here just going  
9 through farmland and some forestlands. It's  
10 wide open work.

11 See there to the right, that is a  
12 future spur road. We're just doing some  
13 embankment there for it now and widening of  
14 the grading on mainline 301 to accommodate  
15 that future expansion. There's no work on  
16 that as of yet. And it keeps going along.  
17 This is Armstrong Corner Road.

18 And then we'll come up, and this  
19 is the North Middletown interchange. There's  
20 some roundabouts there. And we'll curve over.  
21 We'll go over Summit Bridge Road. Summit  
22 Bridge Road gets dualized under the 2B  
23 contract. We'll go over the Norfolk Southern  
24 railroad. This is in the 1C contract limits.

1                   We'll come here and we'll turn  
2 north here in a minute. That's the bridge  
3 over Drawyer Creek. You can see this is Cedar  
4 Lane off to the right, Cedar Lane Elementary  
5 School. This area of farmland over to the  
6 right here. South of 896 is available for  
7 contractor staging. Boyds Corner Road, 301 up  
8 north Boyds Corner Road. Coming up there we  
9 have a wildlife culvert just north Boyds  
10 Corner Road.

11                   And then we'll turn here to the  
12 east in a minute as you head over to Route 1.  
13 This is coming up on the Jamison Corner Road  
14 interchange. The Whitehall development is off  
15 to the left on Lorewood Grove Road and Jamison  
16 Corner Road. This is a full diamond  
17 interchange, ramps on the north serving end,  
18 gantries for the AET facilities.

19                   And we'll come up here. That's  
20 just about the limits. Hyett's Corner Road.  
21 It's a very deep cut there, 20 feet. That's  
22 for some utility relocations have to occur  
23 after the road contractor has done his  
24 excavation, and there's some items in there

1 for the contractor to do.

2           These are the ramps coming off.  
3 This is what we call the big bridge up and  
4 over Route 1 northbound ramp. And it comes  
5 over, merges in with the relocated northbound  
6 ramp for 13. There's a new bridge over Scott  
7 Run as well as the widening of the southbound  
8 SR1 bridge over Scott Run.

9           So we think that video is very  
10 helpful to help you visualize.

11           So heading from south to north,  
12 I'll just give a brief overview of each one.  
13 Contract 3 extends into Maryland. It's about  
14 3.7 miles of mainline work. Mill and overlay  
15 as well as other work in Maryland. We have  
16 ramps to and from the weigh station.

17           The weigh station will be closed  
18 during the construction, but there are some  
19 weigh-in-motion items that have to be  
20 addressed that are associated with the weigh  
21 station.

22           There's about a little over a  
23 million yards of earthwork. Bituminous  
24 concrete roads are labeled there. And there's

1 an interface with Contract 2A at the  
2 interchange here, and we have provisions in  
3 the contract for the Contract 3 drainage that  
4 has to discharge up through there as well as  
5 just access issues in that area.

6 There are two bridges in this  
7 contract. They're very similar except for the  
8 width. The lengths are very similar, you see.  
9 One thing we want to point out is down on the  
10 Strawberry Lane Bridge down at the bottom just  
11 north of the Maryland line there are aerial  
12 138kv and 230kv aerial lines that go right  
13 over the bridge location.

14 There are no outages that are  
15 going to be allowed on that bridge. We have  
16 details in the plans that show required  
17 20-foot clearance to those lines as well as  
18 allowing for a 20-foot blowout for the sway  
19 during windy conditions. Both of those have  
20 pile alternatives that Jim will talk more  
21 about a little bit later.

22 I just want to mention that most  
23 of the bridges have bid options on the piles,  
24 one type or the other.

1           The major borrow source for this  
2 project is at the Levels Road mitigation site,  
3 which is off to the west of the South  
4 Middletown interchange. Contract 3 and  
5 Contract 2A will be working in the area at the  
6 same time.

7           We basically divided it in half  
8 so that Contract 3 has access to these areas  
9 on the south side of the borrow site. This is  
10 the large wetland mitigation site also. And  
11 there will be milestones for the Contract 3  
12 contractor to complete his work within each  
13 one of those two areas, Areas 2 and 3, to then  
14 allow the Contract 2A contractor to move into  
15 those areas.

16           And Contract 2A, this is our  
17 biggest contract. This is 4 and a half miles,  
18 building the half of the interchange, grading  
19 only. North Middletown interchange is grading  
20 only. Several bituminous concrete roads,  
21 Bunker Hill Road.

22           Bunker Hill Road also has a  
23 temporary run around road to maintain traffic.  
24 We're not able to close that road down except

1 for very short periods of time to make the tie  
2 in because of the traffic. That's also where  
3 Appoquinimink High School and Bunker Hill  
4 Elementary School are located.

5 There's some Summit Bridge Road  
6 phasing when we get to that project, that end  
7 of it. One of the initial phases is doing  
8 that work. There is a relocation of the  
9 Drawyers tax ditch that has to occur, and we  
10 need to phase that across Summit Bridge Road  
11 as well as extending it underneath of the 301  
12 mainline embankment.

13 You can see the direct interfaces  
14 with Contract 3, Contract 2B, which is working  
15 on Summit Bridge Road, Marl Pit Road, and  
16 Armstrong Corner Area, and, as I mentioned,  
17 this will be opening 301. We'll have a big  
18 day to open 301 in three years from now.

19 Then we have bridges at ten  
20 locations. This is how they're listed in the  
21 contract plans. The 301 over Norfolk Southern  
22 Railroad is a little unique in how it's  
23 getting constructed. The north embankment on  
24 the north side of the railroad is being

1 constructed by Contract 1C. They're also  
2 building some elements of the abutment,  
3 basically the MSE walls and the pile casings.

4 There are provisions in the  
5 contract then for Contract 2A to have access  
6 to that area off of 896 for a period of time.  
7 There's a milestone in Contract 1C for them to  
8 complete their work.

9 Maintenance of railroad traffic  
10 is a requirement, and not only just  
11 coordinating the flaggers and telling the  
12 railroad what, we're going to have to tell  
13 them how we're going to do it. So there are  
14 erection procedures and submissions we have to  
15 make to Norfolk Southern that would prove to  
16 them that your crane's not going to fall over  
17 when you're doing your lift.

18 Associated work with this is the  
19 301 over Summit Bridge Road. It's a two-span,  
20 concrete girders, pile alternatives. And,  
21 again, because it's over the dualization  
22 that's been done on Summit Bridge Road,  
23 there's a lot of phasing and temporary road  
24 work to shift traffic around.

1           Armstrong Corner Road is a simple  
2 90-foot single span. One of the issues there  
3 will be coordinating the hauling from the  
4 source here to the area in between Armstrong  
5 Corner Road and Summit Bridge Road to build  
6 the interchange area.

7           This is a mistake. Bunker Hill  
8 Road should be over 301, not the other way  
9 around. It's a simple two-span. Again, I  
10 mentioned that there's a temporary run around  
11 road, and we also have to maintain vehicles as  
12 well as pedestrian and bike traffic.

13           We have some bridges over these  
14 tributaries and small sandy branches. That's  
15 at the south end of the project. And  
16 maintenance of stream flows at those  
17 locations.

18           301 is over Sandy Branch. Same  
19 thing as I mentioned, over the streams have  
20 concrete abutment walls.

21           And the 301 over connector road,  
22 that's the one up at the North Middletown  
23 interchange. Again, it's a single span, MSE  
24 walls and H piles.

1                   We also have 301 over Drawyers  
2 Ditch. This is the box culvert I was  
3 mentioning that goes under Summit Bridge Road  
4 as well as the embankment. It's 507, almost  
5 508 feet long. And in some of these larger  
6 culverts as you go into the plans you'll see  
7 that there's a requirement to place channel  
8 bed fill inside of the culverts, so you need  
9 to consider how you get that in there. Then  
10 we have a precast concrete arch, 42-foot at  
11 Ramp C.

12                   Major borrow source again at  
13 Levels Road site. 2A will have initial access  
14 to the northern area, Area 1 on the north end.  
15 After access to Areas 2 and 3 of Contract 3  
16 per the milestones will be identified in the  
17 contract.

18                   As I mentioned, there's some  
19 flexibility on the final side slopes in some  
20 of the areas to balance the amount of earth  
21 that will come out of there, but there is a  
22 final grade elevation and a final bottom area  
23 that we have to achieve for the permit  
24 conditions.

1                   And we do have an excess  
2 stockpile area on the Contract 2A contract  
3 which is along the spur road south of  
4 Armstrong Corner Road. The stockpile area, as  
5 I mentioned, is along this area south of  
6 Armstrong Corner Road.

7                   Contract 2B is doing the  
8 dualization of Summit Bridge Road, also has  
9 some widening of Armstrong Corner Road and  
10 Marl Pit Road. The intersection with the  
11 connector road here, and that coordination is  
12 a direct interface with Contract 2A.

13                  Again, we expect this 2B contract  
14 to be completed before we're ready to put  
15 traffic up on the new mainline, so there will  
16 be some traffic control devices that the 2A  
17 contractor is expected to take over from the  
18 2B contractor and then open up traffic on the  
19 road.

20                  The 1C contract is on the north  
21 side of the railroad up to 896. It's about  
22 1.8 miles. Access to this area will be from  
23 896. Interfacing with both of the contracts  
24 on either end of it.

1           It has five major borrow sources.  
2 I've identified them here in these purplish  
3 areas. The one area that's off to itself is  
4 just a wetland mitigation site. There's just  
5 some very minor grading to be done there, also  
6 some plantings have already been installed  
7 there to bring that field back to a wetland  
8 mitigation site.

9           Again, can't emphasize enough  
10 that each one of the sites because of the  
11 permit conditions have requirements, grading  
12 plans, the limits of how deep you can go and  
13 how deep you can't go. So please read those  
14 very carefully.

15           We have three bridges within this  
16 location. One is a bridge over Drawyer Creek.  
17 There are dual pipes. These are 190 feet  
18 long, concrete outlet walls. It's off of the  
19 existing stream alignment. We then have the  
20 stream relocation and a lot of specialty items  
21 that go along with that stream relocation.

22           US13 over Drawyer Creek, that's  
23 the traditional 140-foot single span, concrete  
24 girders. This one does have a temporary

1 surcharge location, and we'll have to monitor  
2 the settlement that goes with that.

3           And we talked about the northern  
4 part of the 301 over Norfolk Southern  
5 Railroad. That's doing the walls, the pile  
6 casings that go in with the walls. And  
7 they'll also have to have maintenance of  
8 railroad traffic requirements.

9           The 1A contract, showing the  
10 limits there in green. It's the first one to  
11 be advertised next Monday. About 3 and a half  
12 miles. Interchange Jamison Corner Road with  
13 some roundabouts.

14           The Jamison Corner Road also has  
15 a temporary run around road. That is  
16 essential to maintain traffic in the area  
17 before we can close down Hyett's Corner Road  
18 to start hauling out some of the major borrow  
19 sources that are north of Hyett's Corner Road.

20           St. Georges Technical School has  
21 been very involved in our project here. We  
22 would like to get the berm that we have  
23 designed built as soon as possible.

24           1.6 million cubic yards of

1 earthwork. Again, as I mentioned, at Hyett's  
2 Corner Road there is a very deep cut on the  
3 south side of Hyett's Corner Road. We show  
4 that the contractor is to excavate and provide  
5 a utility corridor in that area.

6 The contractor will then be  
7 installing conduit and manholes and casings  
8 for various utility companies, both south of  
9 Hyett's Corner Road and north of Hyett's  
10 Corner Road. So that's got to get done.

11 The utilities will be furnishing  
12 those materials for you to install, but we've  
13 got to get those done so then the utility  
14 companies can come in and complete their work  
15 before we can complete the excavation of the  
16 existing Hyett's Corner Road where the  
17 utilities are now located.

18 We have three major borrow  
19 sources. They're all north of Hyett's Corner  
20 Road. The Village of Scott Run West and  
21 Village of Scott Run East are both to the west  
22 of the new 301 alignment. Hyett's Corner LLC  
23 is in this area here. There's just a small  
24 shallow, I call it shallow grading for that

1 area.

2                   These areas, especially the  
3 Village of Scott Run West and East, all three  
4 of them are adjacent to Scott Run, which is  
5 very important to the resource agencies, so  
6 there will be a lot of people interested in  
7 what happens in those. And, again, there's  
8 parameters and requirements in the contract  
9 documents of how the excavations have to be  
10 performed in that area.

11                   There's a milestone on this  
12 project to have the work done. It needs to  
13 get done to complete 301 to be open to  
14 traffic. The duration of this will extend a  
15 little bit further than that for everything  
16 that needs to get done.

17                   We have bridges at seven  
18 locations on this contract. There's one over  
19 the unnamed tributary north of Hyett's Corner  
20 Road. It's a precast concrete arch 60 feet  
21 long.

22                   Hyett's Corner Road over 301, and  
23 then Hyett's Corner Road over Scott Run.  
24 Especially those, the embankment for those and

1 these bridges are identified to be done later  
2 in the contract after hauling out of the major  
3 borrow source has been completed.

4 We have 301 over Scott Run. Very  
5 long two-span bridges, steel girders. Over  
6 Jamison Corner Road it's a very long  
7 single-span bridge. We have 301 over 896.  
8 This is another single span.

9 Then we have this wildlife  
10 culvert. It's a precast concrete culvert. It  
11 has an open bottom, and it has cast-in-place  
12 foundations. Inside dimensions are 23 by 17,  
13 and it's 160 feet long. This is meant to  
14 allow wildlife passage in the future.

15 You need to take a look at the  
16 details of those. It's not just as  
17 straightforward as the box culvert that was  
18 mentioned here. Inside of that box culvert  
19 there's riprap, stone mix, and channel bed  
20 fill. Just make sure you understand what's  
21 going on there.

22 Contract 1B is going to construct  
23 the northbound and southbound ramps to Route  
24 1, make the connections to Route 1. We also

1 have to do some relocation of US13 to  
2 accommodate the new northbound ramp as it goes  
3 in between US13 southbound and northbound  
4 Route 1.

5 We have some pretty extensive MSE  
6 walls along that northbound ramp in that area  
7 once it gets onto the east side of Route 1.  
8 It was on the west of 13. There is some very  
9 large barrier walls on Route 1 at the bridge  
10 piers.

11 We have migratory bird  
12 restrictions that's applicable to both of the  
13 bridges over Scott Run. Look at the  
14 parameters for that, either starting work or  
15 continuing work or we need to do some netting  
16 before the season occurs to prevent the birds  
17 from nesting.

18 The one major borrow source is  
19 also over on the west side of the new 301  
20 alignment. We have provisions to haul out of  
21 that area down along the east side of new 301  
22 that's in the 1A contract to come onto Hyett's  
23 Corner Road.

24 But there's a lot of hauling that

1 needs to occur from that borrow source over to  
2 the west side of Route 1 in order to build  
3 that embankment that we talked about and the  
4 MSE walls.

5 The other bridges on 1B, we have  
6 the southbound bridge over Scott Run. That's  
7 a widening of an existing bridge. It matches  
8 up to the existing two-span concrete girders.

9 The 301 northbound over Scott  
10 Run, same length but it's a new bridge, so we  
11 do have the single span.

12 And the big bridge that we talked  
13 about. This is a snapshot out of the  
14 animation. It shows 4 spans, 695 feet long.  
15 It's curved. That has the PCC post tensioned  
16 pier caps with 8,000 PSI concrete. There's  
17 one of those pier caps over southbound Route 1  
18 and then another one over northbound Route 1.  
19 Also incorporating high performance steel.  
20 And, again, a lot of MSE walls associated with  
21 this project.

22 The 1D contract is south of the  
23 US13 work that's under the 1B contract. It is  
24 also building a portion of the Ramp R, which

1 is relocating the existing northbound ramp  
2 from 13 to SR1 down to Port Penn Road. We  
3 have a realignment of Port Penn Road.

4 We're adding through and turn  
5 lanes on southbound 13. We're adding a very  
6 long left turn lane on northbound 13,  
7 relocating access to the toll building and  
8 parking lot reconfiguration, water and sewer  
9 services to the toll building.

10 And because of the utility  
11 relocation by Eastern Shore and DP&L Gas  
12 impacting the toll plaza parking lot, we need  
13 the 1B contractor on board to help with the  
14 maintenance of traffic and abatement of that.  
15 So that's described in the phasing of this  
16 contract.

17 That's the end of my presentation  
18 if anybody has any questions. I know you've  
19 got some questions.

20 UNIDENTIFIED SPEAKER: Is the  
21 tolling equipment a separate contract, or is  
22 that integrated into each contract?

23 MR. MARTENEY: The tolling  
24 equipment will be provided by the separate

1 toll integrator. What we're building under  
2 the road contracts is the basic  
3 infrastructure, conduits, and those kind of  
4 elements.

5 There will be milestones and  
6 information in the contracts for when the road  
7 contractors need to have that work completed  
8 including some of the road pavements in order  
9 for the toll integrator to come in, install  
10 his equipment, and test it also.

11 UNIDENTIFIED SPEAKER: Do you  
12 know approximate prices of each of these  
13 contracts?

14 MR. MARTENEY: We do, but I don't  
15 know what we're -- I don't have it off the top  
16 of my head.

17 UNIDENTIFIED SPEAKER: Would the  
18 information be available, just a range?

19 MS. GUNN: We have the total  
20 amount. I don't have it now. We don't have  
21 it right now.

22 MR. MARTENEY: Ask the question,  
23 and we'll see about getting those to you.

24 UNIDENTIFIED SPEAKER: Thank you.

1 MR. MARTENEY: Anybody else?

2 UNIDENTIFIED SPEAKER: Is all the  
3 right of way clear?

4 MR. MARTENEY: We have access,  
5 right of entry to 95 percent, 99 percent of  
6 the right of way. We expect to have -- we  
7 have right of way statements that say the  
8 right of way will be clear. So when we go to  
9 advertisement that information will be  
10 available.

11 Anybody else?

12 Thank you. And now Javier.

13 MR. TORRIJOS: My name is Javier  
14 Torrijos. I work for DelDOT. I'm the  
15 assistant director of construction.

16 And a lot of concrete, a lot of  
17 dirt, a lot of bridges, big bridge, and a lot  
18 of environmental requirements for the work in  
19 Maryland, so we're pretty excited about this  
20 project. So I'm going to introduce basically  
21 how we're going to manage this project from  
22 the construction standpoint.

23 As you can see here, FHWA, Mr. Dan  
24 Montag, Dan, if you could raise your hand,

1 he's going to be basically our point of  
2 contact for this project. And Rob McCleary,  
3 our chief engineer, is going to be the head of  
4 this project.

5 Everything in blue that you see  
6 here is all DelDOT employee, and then the  
7 orange color is basically the GEC that  
8 consists of Century Engineering and RK&K.

9 And then at the very bottom  
10 you'll see the green color there is basically  
11 our inspection consultant staff that we're  
12 going to basically hire four consultants to  
13 manage the seven projects. Each one of the  
14 consultant firms is going to have two  
15 constructions projects except one which is  
16 only go manage Contract No. 3.

17 So in orange right in the center,  
18 basically this project has basically three  
19 teams. You're going to have engineering  
20 support, which consists of the environmental  
21 group. You're going to have the environmental  
22 monitor. You're going to have CCR folks.

23 And also, it's not listed here,  
24 we're also going to have an E&S stormwater

1 engineer, and that person is basically going  
2 to be the liaison between the field folks, the  
3 environmental monitor, and the E&S CCR guys.

4 As many of you know, the CCR  
5 guys, all they do is just strictly report on  
6 the conditions of the project. They don't  
7 offer any recommendations. They strictly rate  
8 your project. So it's extremely important  
9 when issues do come up that we have someone  
10 who can help us address those issues, and  
11 that's going to be the E&S engineer,  
12 stormwater engineer.

13 In the center of the orange is a  
14 construction manager, and that is going to be  
15 managed, as I said earlier, between the staff  
16 at RK&K as well as Century Engineering. We're  
17 going to have the scheduler, who's going to  
18 basically analyze all of contractor schedules  
19 that are submitted on the project.

20 And the chief of survey is going  
21 to be extremely important because we're going  
22 to monitor all the dirt work moving operations  
23 on the 301 project. Any changes, as Alan had  
24 alluded to earlier, have to go through an

1 approval process when it comes to traffic or  
2 TMP, and that's going to be also run through  
3 that office and obviously through our section  
4 at DelDOT.

5 We're also going to have  
6 earthwork and pavement. There's a lot of  
7 conduit and dirt moving operations, and we  
8 want to make sure that that individual works  
9 very closely with the contractors doing the  
10 job, making sure that the embankment is placed  
11 properly and that the project is monitored  
12 very closely from that standpoint.

13 Then the third part of this house  
14 is basically design side. On the design side,  
15 Mark Tudor, who's basically the lead on the  
16 US301 along with Diane Gunn, and we have folks  
17 who are going to managing basically the design  
18 side, all the shop drawings, all our client  
19 submittals, any design changes and design  
20 issues that come up are going to be handled  
21 through the GEC through Alan Marteney.

22 And the TIFIA budget manager  
23 is -- obviously this is a project where we did  
24 TIFIA money, and so working with FHWA and the

1 U.S. Department of Transportation we have to  
2 report on the expense on this project. So  
3 that has to be very closely monitored.

4 Then we go to the next here, the  
5 very bottom here -- I'm sorry. I forgot to  
6 mention above the GEC construction managers we  
7 have basically two group construction  
8 engineers that are going to be responsible for  
9 both projects -- for the entire 301 project,  
10 excuse me. Section 3 and Section 2 will be  
11 managed by Jon Ledger, and Section 1 will be  
12 managed by Chris Costello.

13 Then the area engineers, they  
14 will be DelDOT. And right below that we're  
15 going to have -- each one of those are going  
16 to have a project resident. So we're going to  
17 have a total of four project residents who the  
18 consultant inspection staff is going to report  
19 directly to them.

20 This is extremely important. As  
21 we move along the 301 project in the  
22 construction phase, it's important that we're  
23 very proactive with the public, communicating  
24 with the public.

1           We will be having construction  
2 informational meetings with the public, and  
3 it's important that the contractor staff be  
4 there as well and provide information as far  
5 as timing, work activities that are being  
6 conducted throughout the US301 project.

7           And it's also important to note  
8 that there sometimes might be issues that are  
9 anticipated during construction, but the  
10 public is going to be asking questions, so we  
11 certainly will be handling those questions,  
12 but we'll ask contractors to participate.

13           Also on this project will be a  
14 number of audits that will be performed during  
15 construction, not only by the state. This is  
16 the state contact, PJ Henry. We have his  
17 information if you have any questions  
18 regarding handling audits.

19           But also this project is going to  
20 have a PODI requirement for oversight on some  
21 of the projects, semi oversight on some of the  
22 projects, and so Dan will be setting up that  
23 criteria, and he will be doing his audits as  
24 well on the project.

1 Do we have any questions?

2 Thank you. And I'm going to hand  
3 it over now to Jim Hoagland.

4 MR. HOAGLAND: Good morning,  
5 everyone. Thanks for coming out today.

6 I want to talk about contractual  
7 issues, and these are the individual projects  
8 once they're released for advertisement. The  
9 first thing we'll point out is the internet  
10 site at the top. The bids.delaware.gov, that  
11 is the website where all Delaware agencies  
12 advertise their projects. That's where these  
13 projects will be advertised.

14 Make yourself a little familiar  
15 with it before next week when the first  
16 project is advertised. You can sort down in  
17 this blue bar. When you get to that site, you  
18 can sort by any of these titles. I suggest  
19 you sort by the agency. You'll see all DelDOT  
20 projects together, and you'll find any project  
21 that we have advertised. Of course you're  
22 looking for the Route 301 project.

23 A reminder to bidders that don't  
24 currently do work with DelDOT is you must be

1 registered with us to submit a bid. And to do  
2 that we ask that you go to  
3 dot-ask@state.de.us. Just tell us you're  
4 interested in registering. We'll guide you to  
5 the website that's on deldot.gov for  
6 registration information for contractors.

7           You can register at any time.  
8 You must be registered to submit your bid.  
9 Registration only takes a day or so. It's a  
10 really short form for registration. But we  
11 must have that in hand prior to your bid.

12           The other thing I want to mention  
13 is once a bid is advertised, there's going to  
14 be an email address for questions for that  
15 particular project. And different projects  
16 will have different email addresses for  
17 questions, so make sure you concentrate on  
18 which contract you're looking at, direct those  
19 questions to the specified email address.  
20 There are a few times we'll have more than one  
21 contract advertised at the same time.

22           Also on the informational website  
23 that Diane was showing us earlier today, make  
24 sure you don't count on items that are

1 addressed in there as part of your contract.  
2 Your contract document that you're bidding on,  
3 questions and answers have to go through the  
4 website or the email address that's referenced  
5 on that contract.

6 And questions will be asked and  
7 answered and posted same place here at  
8 bids.delaware.gov, and we'll be refreshing  
9 those questions and answers frequently during  
10 the advertisement.

11 There are DBE trainee  
12 requirements for this, and there are DBE goals  
13 established. And each project may have  
14 different goals and different trainee  
15 requirements. So, again, concentrate on the  
16 contract that you're working on the bid for  
17 those requirements.

18 There's a website here that you  
19 can go to to request information. Generally  
20 any information you need from DelDOT is at  
21 deldot.gov, and go under the Information tab  
22 for most of the areas that you're going to be  
23 looking for information on, DBEs, general  
24 bidding requirements, that type of thing.

1           If you have questions regarding  
2 DBEs or anything for a particular project,  
3 make sure you use that project's email address  
4 for your question, and we'll route it to  
5 Ramon's group, our DBE contract section, so  
6 they can address that, and we'll post the  
7 answers.

8           Now, for the DBE trainee  
9 requirements, if the contractor bidding on it  
10 has DBE trainees, they'll be listed on the  
11 contract itself. You'll see there the number  
12 of hours in the bid documents.

13           And reminder that you must, if  
14 you are the apparent low bidder, you must  
15 select proposed trainee plans within ten days  
16 after the bid. So make sure you're working on  
17 those ahead of time. And if you need more  
18 information on that, again, refer you to the  
19 website for our DBE group.

20           And the ten-day requirement is a  
21 federal requirement for us. It's part of our  
22 program plan. So if you are the apparent low  
23 bidders, you can start working right away for  
24 each contract.

1                   Separate from the DBE contract  
2 there's also a craft training prequalification  
3 requirement. The craft training  
4 prequalification requirement is addressed in  
5 each particular contract. The requirement  
6 calls for each bidder to have documentation  
7 presented with their bid that they have met  
8 the prequalification requirements. They'll be  
9 listed in each of the contracts for details.

10                   And this applies to all prime  
11 contractors and all subcontractors.  
12 Subcontractors that you submit with your bid  
13 as well as any subcontractors that are added  
14 later are required to conform with this craft  
15 training prequalification. There's a separate  
16 form that will be part of the bid documents  
17 that you'll have to submit for that.

18                   The requirements for the  
19 prequalification is that the program has to be  
20 an approved craft training program, approved  
21 by the State of Delaware Department of Labor,  
22 the U.S. Department of Labor, or any other  
23 state Department of Labor that you're  
24 participating in. There are steps outlined

1 here, and they will also be outlined, of  
2 course, in the contract itself.

3 What is the definition of our  
4 prequalification requirement? The form that  
5 will be with the bid must be received. We  
6 must also receive your certification of craft  
7 training enrollment as well. If you don't  
8 already have that, there's steps outlined in  
9 the contract and in this box here that outline  
10 it.

11 So this is not something you want  
12 to wait until the last day or week. You want  
13 to get on this right away. Delaware  
14 Department of Labor will be reviewing and  
15 answering any questions you have with it.  
16 Their website or email address will be in the  
17 bid documents. Turnaround time, Kevin, I  
18 believe you thought was two, three weeks.

19 MR. CALIO: Optimally a week, but  
20 preferably two or three weeks.

21 MR. HOAGLAND: Optimally a week.  
22 Maybe two or three weeks to get your  
23 certification in. So make sure to start on  
24 that right away if you're not already

1 participating in a state-approved or  
2 federal-approved craft training program.

3 This is Kevin's contact  
4 information if you have questions certainly  
5 regarding the craft training requirement.

6 And, again, your craft training  
7 documents must be submitted with your bid. By  
8 state law we cannot accept your bid if those  
9 documents do not accompany your bid. So if  
10 there's any questions on those, the website on  
11 each contract will address that as well. But  
12 do not wait until the last week to try and get  
13 that process started.

14 There's quite a few other  
15 documents that are required to submit with  
16 your bid as well. Each of those will be  
17 addressed in your contract for each project.

18 And, again, remember that if you  
19 are registered in another state DOL, all you  
20 need from them is your proof of registration  
21 or certification that you are a participating  
22 member of a program.

23 There's a picture, a small  
24 picture. The form is very simple. That's the

1 form that must accompany your bid. Of course  
2 you have to fill it out first. But then make  
3 sure that accompanies your bid.

4 In DelDOT for each of our  
5 contracts when you go to the bids.delaware.gov  
6 website, you'll have all the documents  
7 electronically available to view on the  
8 website. All the plans will be up there. The  
9 main bid document proposals are up there. Any  
10 background information you need for that  
11 particular contract will be up there.

12 It's the same version that the  
13 contractors who are interested in bidding,  
14 when they notify us by email that they're  
15 interested in bidding, we'll put them on a  
16 bidders list and send them a disk of  
17 information. And that disk of information is  
18 the same information really that's posted on  
19 the web with the exception of watermarks.  
20 They're removed for their use.

21 But that is the requirement, that  
22 you let us know, make sure your company  
23 appears on the bidders list. The plan holder  
24 list is what it's called on the website. If

1 your name's not on that list, we cannot accept  
2 your bid. And that happens once you register  
3 with us and request a bid package.

4 And you cannot use any of the  
5 items from the website to submit your bids.  
6 You must use the documents off your website.  
7 I'm sorry. Off of your disk that we send you.

8 There is one clarification to the  
9 prequalification. And there is a portion of  
10 the Delaware craft training program that is  
11 being addressed temporarily. So right now  
12 this Section 3.1, which you'll be reviewing in  
13 your documents, contract documents, is not  
14 enforceable right now. But, again, follow  
15 that information from the website and what  
16 that entails.

17 One of the websites will also  
18 have federal prevailing wage rates for  
19 Maryland. We are actually operating into the  
20 state of Maryland for that one project, so you  
21 will have the Delaware wages that will be in  
22 that contract, but once you're working inside  
23 of Maryland, you'll use the higher --  
24 actually, you'll use only the federal wage

1 rates that are required from Maryland for  
2 working in Maryland.

3           So it's going to be some  
4 recordkeeping for you because the contract  
5 covers both Delaware and Maryland. When  
6 you're in Delaware's side you must use the  
7 higher of the federal prevailing wage rates or  
8 the Delaware state rates. But all three will  
9 be in that one contract.

10           Al mentioned options for pile  
11 alternatives. In the bid documents you'll see  
12 option one, actually pile alternates option  
13 one and two. You must bid only one of those  
14 options. If you are going to put language in  
15 there, if you mistakenly bid both, the options  
16 we're going to -- if you fully bid each  
17 option, we're going to use the lower of the  
18 two and disregard the higher of the two.

19           But we really want you to leave  
20 the section that you're not going to base your  
21 bid on, leave that section blank. There's  
22 only, like, four, five items in each of those  
23 sections. So on the option, pick one of the  
24 two options, fill out the bid for that option,

1 and leave the second option blank.

2           There are what we have called  
3 breakout sheets. Breakout sheets are  
4 detailed -- contain some detailed information  
5 that are based on bid items. The breakout  
6 sheets must be submitted; however, you have --  
7 you can submit the breakout sheet with your  
8 bid or within seven days of your bid to  
9 contract administration.

10           Any errors, if your bid sheet  
11 item does not match your item bid on your bid  
12 sheet, then we will send you your breakout  
13 sheet back to make corrections. It must equal  
14 the bid amount on your bid.

15           We are going to request escrow  
16 bid documents for this project. On our  
17 deldot.gov website there's a section if you  
18 look under information and publications,  
19 there's our standard specifications.  
20 August 2001 is our current specs.

21           And there's a section in there, I  
22 think it's 103.09, that details how that  
23 process occurs. It's a little bit long, but  
24 just cover that and make sure if you are the

1     apparent low bidder those are the documents  
2     that we'll be looking for and process that  
3     we'll use to put those into escrow.

4             And questions during bid  
5     advertisement, again, the particular project  
6     has its own dot-ask email address, so make  
7     sure to go by what's in that contract for your  
8     questions and answers when you email them in.

9             Does anyone have questions?

10            UNIDENTIFIED SPEAKER: Will this  
11     presentation be available?

12            MS. GUNN: Yes. We'll post this.  
13     It'll be up on our contractor website by  
14     tomorrow, and then the transcript will be  
15     available a week later, the following Tuesday.

16            MR. HOAGLAND: I'll take  
17     questions on the section I just presented.  
18     Then we'll have general questions.

19            UNIDENTIFIED SPEAKER: Can you  
20     post Excel versions of the schedule of the bid  
21     items in advance of the advertisement date on  
22     the information website for each contract or  
23     at least unlock the PDFs?

24            MR. HOAGLAND: You mean of the

1 ones that are there?

2 UNIDENTIFIED SPEAKER: Yes. You  
3 have schedules of items, and there's nothing  
4 we can do. We'd like to plug the jobs  
5 ourself, but we can't do that.

6 MR. HOAGLAND: We'll get back to  
7 that and answer that on that website  
8 question-and-answer section. We'll post that  
9 answer.

10 UNIDENTIFIED SPEAKER: Do you  
11 have an estimated time of award after bids are  
12 received?

13 MR. HOAGLAND: Traditionally  
14 it'll be within 30 days after bids that we'll  
15 have an award made. Of course, at the time of  
16 bid we have an open meeting, and the apparent  
17 low bidder will be known at that time.

18 UNIDENTIFIED SPEAKER: You said  
19 that you had to be on the bidders list in  
20 order to bid on this project. I'm sure there  
21 are going to be several joint ventures bidding  
22 on them. As long as the individual joint  
23 ventures are listed, is that acceptable?

24 MR. HOAGLAND: If you're actually

1 going to have a joint venture, there is a  
2 little different process for that. So you'll  
3 want to contact us at that project's bid  
4 question site for the details on that. It's  
5 just a different form that's utilized for your  
6 submissions if it's truly a joint venture, not  
7 a prime/sub-type arrangement. And one of the  
8 things we'll require is joint legal entity  
9 documentation.

10 Al, did you want to clarify?

11 MR. MARTENEY: Yes. One thing I  
12 wanted to clarify about the bid items that are  
13 on the website now, you'll notice that the  
14 same item is listed many times. In the bid  
15 proposals that we put out we're requesting  
16 prices for each individual bridge.

17 So like superstructure will be a  
18 set for each bridge will be a separate bid.  
19 The same pay item, but it'll be a separate bid  
20 in each one of these different categories. So  
21 if you look at the bid item list or the item  
22 list that's on the contractor information  
23 website now, that's why you see the same item  
24 listed many different times.

1           And sometimes some of those items  
2 will be in category one, which is the roadway  
3 items also. So just so you understand why  
4 there's the same item listed many times.

5           MR. HOAGLAND: From a contractual  
6 point of view, I urge you to disregard the  
7 general information website if you're  
8 preparing your bid and go strictly by the bid  
9 documents. There will be no defense to I  
10 thought that's what you said on your  
11 information website because that does not hold  
12 any weight once the contract's advertised.

13           Any other questions about the  
14 contract aspects?

15           UNIDENTIFIED SPEAKER: Jim, in  
16 light of ABC suing New Castle County over the  
17 craft labor trainee program, are you guys  
18 worried at all that it could delay the opening  
19 of bids or starting of the bids?

20           MR. HOAGLAND: We're not. We  
21 have our eye on it, but we'll have to wait and  
22 see what happens there.

23           Anything else?

24           Okay. I'll turn it back to

1 Diane.

2 MS. GUNN: That web address that  
3 we have up here, it's the longer version, but  
4 the shorter version is on your agenda. It's  
5 the us301.deldot.gov. It's a little bit  
6 quicker to go to.

7 You can find a lot more  
8 information on our website. We have a lot  
9 more info on our financial approach, and we  
10 will be following a due diligence process.  
11 We'll examine the first two contract bids, and  
12 we'll also look at the final bond ratings and  
13 the current interest rates prior to settling  
14 the toll revenue bonds.

15 If there's any more questions,  
16 you can visit our contractor website and ask  
17 questions through there. Again, the  
18 presentation will be online tomorrow, and then  
19 the transcript will be up about a week later.

20 That's all we had for today.  
21 Thank you for coming, and thanks for your  
22 attention.

23 UNIDENTIFIED SPEAKER: For the  
24 financing of those two contracts, if they come

1 in higher than their anticipated cost, is that  
2 going to jeopardize the contracts?

3 MS. GUNN: It's a combination of  
4 a lot of factors, interest rates and our bond  
5 ratings, so we're going to be looking at  
6 everything together. So I can't tell you an  
7 exact in terms of what will be the deciding  
8 factor in it all.

9 UNIDENTIFIED SPEAKER: But after  
10 the first two contracts are bid, that's when  
11 you'll make a decision?

12 MS. GUNN: Yes. Yes. We'll be  
13 looking at it after the first two contracts.

14 UNIDENTIFIED SPEAKER: When is  
15 the second one advertised?

16 MS. GUNN: The second one will be  
17 coming out in September, in mid-September.

18 MR. HOAGLAND: I wanted to make  
19 one clarification regarding the DBE goals.  
20 The forms that you submit to meet your DBE  
21 goal at the time of bid must also be craft --  
22 meet the craft prequalification requirement in  
23 addition to the DBE requirements, just to  
24 clarify that.

1                   Anything else or anything?

2                   UNIDENTIFIED SPEAKER: Jim, on  
3 the Maryland job do we have to have Maryland  
4 DBEs along with Delaware?

5                   MR. HOAGLAND: Ramon, I'll defer  
6 that to you.

7                   I don't believe so. It's our  
8 contract. If that changes, we'll certainly  
9 spell that out in that contract.

10                  Okay. Thank you all very much.

11                  (Meeting concluded at 11:24 a.m.)

## 1 REPORTER'S CERTIFICATE

2  
3 I, SUSAN ARNOLD YODER, Registered  
4 Professional Reporter and Notary Public, do  
5 hereby certify that the foregoing record,  
6 pages 1 through 64 inclusive, is a true and  
7 accurate transcript of my stenographic notes  
8 taken on August 24, 2015, in the  
9 above-captioned matter.

10 IN WITNESS WHEREOF, I have hereunto set  
11 my hand and seal this 28th day of August,  
12 2015, at Wilmington.

13
