

Detailed Study

Detailed Traffic Analysis

For each Retained Alternative:

Objectives:

- **Determine the performance of study area intersections under the future condition (level of service, delays and back-ups)**
- **Identify intersection improvements where needed**

Process:

- **Create a study area travel demand model**
- **Incorporate future traffic from the proposed Eden Hill Farm development and Kesselring Farm development (west of New Burton Road)**
- **Conduct detailed intersection performance analysis**
