

# **Zoar Road, Speedway Road and Bethesda Road Intersection Improvements**

## **Project Need**

- The existing intersection layout is confusing to motorists.
- There is a history of high crash rates at the intersection.
- Improvements were recommended by the DelDOT Highway Safety Improvements Program (HSIP) in 2002.

## **Existing Conditions**

- Through movements on Zoar Road operate freely while all other movements operate under STOP control.
- Traffic volumes identify Speedway Road/ Zoar Road (Alternate Route 24) as the heaviest movement.
- Tubular markers are located within the center of the intersection.
