Agenda
Phase 2 Working Group Meeting #7

Monday, January 25, 2021, 6:00 pm
Online

1. Introduction
   - Welcome and introductions
   - Summary of notebook materials
   - Approval of October 26, 2020 meeting minutes

2. Henlopen Transportation Improvement District (TID) overview

3. Phase 2 implementation status
   - Overall status update
   - New recommendations to be initiated in 2021

4. Public comment

5. Adjourn
Phase 2
Working Group Meeting #7

January 25, 2021
Agenda

• Introduction
• Henlopen TID overview
• Phase 2 implementation status
• Public comment
How to raise your hand
How to raise your hand
Introduction

• Introductions

• Summary of notebook materials
  • Agenda
  • Presentation
  • Draft minutes of October 26, 2020 Working Group meeting
  • List of Henlopen TID transportation recommendations
  • List of upcoming meetings
  • Updated implementation plan

• Approval of October 26, 2020 meeting minutes
HENLOPEN TID OVERVIEW

deldot.gov/programs/
transportation-improvement-districts/
Objectives of Today’s Presentation

• Review TID development process
• Review recommended transportation improvements
• Review infrastructure fee program
• Review monitoring program
Why Did We Create the TID?

• Comprehensive Infrastructure Planning
• TID Projects Advance in DelDOT’s CTP
• TID Fees Stay Local
• Equitable Treatment of Competing Developers
• Known Costs for Developers
• Expedited Development Reviews
TID Boundary and Target Horizon Year

- 2045 Target Horizon Year for Land Use Forecast
- Participant boundary consistent with growth area in County Comprehensive Plan
2045 Future Land Use Plan
2045 Future Land Use Plan

- Sussex County Planning and Zoning provided a 2045 land use forecast in May 2018, based on existing zoning.
- An estimated 12,867 additional housing units and 1,475,714 square feet of commercial development is expected within the TID participant boundary by 2045 if full build-out occurs.
- This is what DelDOT modeled in order to identify needed transportation improvements.
Results – Level of Service

Level-of-Service

Level of Service A

• Free-flow

Level of Service B

• Reasonably Free-flow

Level of Service C

• Stable Operation

Level of Service D

• Borderline

Level of Service E

• Unstable

Level of Service F

• Breakdown

*Prepared for the US DOT Bureau of Transportation Statistics by the MIT Department of Urban Studies and Planning
Service Standards – What is “Success”? 

- Defined in terms of:
  - Levels of service
  - Lane widths
  - Shoulder widths
  - Sidewalks
  - Transit service
  - Aesthetics
  - Other considerations

- How? A public process
Transportation Plan for the TID
Recommendations – New Connectors

Lines on this map are conceptual and subject to change.
Recommendations – Proposed Widening

Lines on this map are conceptual and subject to change.
Recommendations – Roundabouts
Recommendations – Turn Lanes
Recommendations – Other Improvements

Lines on this map are conceptual and subject to change.
### TID Capital Transportation Program

- **Highlighted projects (~$95 million)** are programmed in DelDOT’s Capital Transportation Program
- Some improvements may advance by other means: FAST, DelDOT Traffic initiatives, etc.

### Infrastructure Fee Program

- Developer contributions are estimated to be about 23.5% of the costs of improvements.

#### Residential Rates

<table>
<thead>
<tr>
<th>Type</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single family detached residential</td>
<td>$4,900 per unit by phase</td>
</tr>
<tr>
<td></td>
<td>$5,145 per unit by lot</td>
</tr>
<tr>
<td>Multi-family residential, low-rise, 1-2 floors</td>
<td>$3,822 per unit by phase</td>
</tr>
<tr>
<td></td>
<td>$4,013 per unit by lot</td>
</tr>
<tr>
<td>Multi-family residential, mid-rise, 3 or more floors</td>
<td>$2,842 per unit by phase</td>
</tr>
<tr>
<td></td>
<td>$2,984 per unit by lot</td>
</tr>
</tbody>
</table>

#### Non-Residential Rates

<table>
<thead>
<tr>
<th>Type</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Under 21 trips per 1,000 SF GFA</td>
<td>$2.88 per sq ft</td>
</tr>
<tr>
<td>At least 21 but less than 34 trips per 1,000 SF GFA</td>
<td>$3.38 per sq ft</td>
</tr>
<tr>
<td>At least 34 but less than 75 trips per 1,000 SF GFA</td>
<td>$3.88 per sq ft</td>
</tr>
<tr>
<td>At least 75 but less than 200 trips per 1,000 SF GFA</td>
<td>$4.38 per sq ft</td>
</tr>
<tr>
<td>200 or more trips per 1,000 SF GFA</td>
<td>$4.88 per sq ft</td>
</tr>
</tbody>
</table>

Notes: Low-rise Multi-family rate is 78% of single-family detached rate. Mid-rise Multi-family rate is 58% of single-family detached rate. Townhomes are considered low-rise multi-family. All non-residential rates are based on the number of trips per 1,000 square foot of gross floor area. This is based on ITE Trip Generation Manual, 10th Edition.
Infrastructure Fee Program

- County collects fees prior to issuance of building permits
- County holds fees in single TID account, to transfer to DelDOT upon DelDOT’s request
- Manner and extent of developer participation to be documented on recorded subdivision or site plan and in an infrastructure recoupment agreement
Infrastructure Fee Program – Development Types Excluded

• Those determined by DelDOT and County to be inconsistent with land use plan and to generate enough traffic to warrant a TIS, will be required to conduct TIS and, as necessary, contribute to off-site improvements

• Development of Garage Studio Apartments

• Minor subdivisions as defined in County Code, up to one application per parent parcel
Fee Calculation and Submittal Form

- Fillable Excel form to calculate fees and to accompany payments
- Owner/developer enters number of residential units by ITE Land Use Codes
- Owner/developer enters square footage of non-residential buildings by ITE Land Use Codes
Monitoring Program

- DelDOT to monitor traffic volumes
- DelDOT to provide County with findings and recommendations in calendar year 2022 and at regular intervals not to exceed every five years
Monitoring Program (continued)

• The County shall, in odd numbered years, to coincide with development of the DelDOT Capital Transportation Program, recommend projects from the TID-CTP for inclusion in DelDOT’s CTP.

• Inclusion of recommended projects shall be subject to DelDOT’s CTP prioritization process.
Phase 2 Implementation Plan Update
78 recommendations

Recommendations to be implemented under current DelDOT projects or initiatives (7 recommendations)

Implement policies and procedures to make the area more efficient, sustainable and beautiful (8 priorities out of 27 recommendations)

Make the most of existing roadway infrastructure (8 priorities out of 20 recommendations)

Make walking, bicycling, and transit more viable as alternatives to driving (5 priorities out of 15 recommendations)

Invest in new infrastructure to support anticipated growth (3 priorities out of 9 recommendations)
Previous status (as of October 2020)

43 of 78 recommendations in progress, ongoing, or completed

• 7 of 7 in Category A – to be addressed by current DelDOT projects or initiatives

• 12 of 27 in Category B – policies and procedures

• 14 of 20 in Category C – make the most of existing infrastructure

• 7 of 15 in Category D – bicycle, pedestrian, transit

• 3 of 9 in Category E – major infrastructure improvements
Current status (as of January 2021)

47 of 78 recommendations in progress, ongoing, or completed, an increase of 4

The final 2 recommendations to be initiated in 2020 are now in progress:

• B-8: Study the feasibility of a parking management system to alert travelers when parking lots at major destinations are full

• D-9: Identify potential connections to and from the Lewes Transit Center
Implementation over the last 2 years

Implementation Progress by Year

- **beginning 2019**:

Category B progress

- B-1 – Require new developments to plan for interconnections to any future development areas and monitor to ensure implementation
  - All subdivision applications are subject to pre-application meetings. Where the potential for interconnectivity to undeveloped parcels is identified, this is discussed with developers prior to application submittal.
  - This is now classified as ONGOING.
Category B progress

• B-2 – Consider modifications to land development requirements and/or the Development Coordination Manual that require additional buffers/setbacks for all new developments for future road expansion

  • In 2020, the Planning & Zoning Commission discussed a potential future revision to the Zoning Code to clarify the maximum extent to which parking may be permitted in the front yard setback.
• B-2 (continued)

• DelDOT has updated the Development Coordination Manual to require greater width along principal arterials, which are the routes most likely to require future widening
  • 50’ right of way from the centerline of the road
  • 15’ permanent easement outside the right of way on each side
  • This results in a 130’ total clear width
• This recommendation is now IN PROGRESS
B-3 – Study the feasibility and anticipated effectiveness of modifying signage, starting in Milford, to encourage through drivers (to points outside the Route 1 corridor between Lewes and Dewey Beach) to use Route 113, Route 5, Route 23, etc.

- Travel time messages are now displayed on variable message signs approaching the beach area.
- This information is also available on the DelDOT app.
• B-7 – Continue TID studies both east and west of Route 1
  • At its October 27, 2020 meeting, Sussex County Council approved the Henlopen TID agreement.
  • A TID overview was presented earlier this evening.
  • This recommendation is now COMPLETE.
Category B progress

• B-8 – Study the feasibility of a parking management system to alert travelers when parking lots at major destinations are full
  • This recommendation is now IN PROGRESS.
  • DelDOT has reached out to DNREC to obtain information on their current parking count and monitoring practices and historic lot count data.
Category B progress

• B-9 – Study enhancing New Road per Byway Master Plan
  • This recommendation is now ONGOING.
  • Implementation will occur over the next 10 years through:
    o CTP projects
    o Canary Creek bridge reconstruction
    o Developer improvements along frontages
• B-14 – Identify locations where trees can safely be planted within the right of way
  • To be initiated in 2021.
  • DelDOT will provide the Working Group with guidelines that govern how trees could potentially be planted within the right of way.
  • Costs for tree maintenance need to be covered.
  • At a future Working Group meeting, members will have the opportunity to provide input on desired locations for trees.
• B-25 – Identify the costs and benefits of dedicating Nassau Commons Boulevard to public use

  • Vineyards developer may be improving a portion near US 9.
  • DelDOT is investigating right of way issues, including maintenance.
  • The Henlopen TID recommended a project to improve Nassau Commons Boulevard, which is currently not funded.
Category B progress

• B-27 – Develop a better process for constituents to request transportation improvements
  • To be initiated in 2021.
  • DelDOT is developing a new portal for the public to identify transportation issues and request improvements.
  • We anticipate that the portal will be complete in fall 2021.
## Category C

Make the most of existing roadway infrastructure

</tbody>
</table>
Category C progress

• C-1 – Conduct a corridor study on Route 9 to determine the feasibility of widening to four lanes
  • Clarified in the implementation plan that widening was recommended by the Henlopen TID study.
  • A project to further advance this effort remains in the CTP.
• C-3 – Initiate a capital project to improve the intersection of Old Landing and Warrington Road

• This is in the CTP, so this recommendation is COMPLETE.
• C-5 – Improve the intersection of Cave Neck Road, Sweet Briar Road, and Hudson Road

• A project is programmed in the FY 21 - 26 CTP.

• Design was scheduled to start in FY 2025.

• Sussex County Council approved FAST (Funding Accelerating Safety in Transportation) on December 15, 2020 and selected this intersection as the first project. DelDOT will begin design on the project within the next month.
Category C progress

• C-7 – Study the feasibility of improving Minos Conaway Road with appropriate lane widths, shoulder widths, turn lanes, curvature, etc.

  • A curve compliance study completed in February 2019 and signage improvements were implemented in March 2019.

  • The Henlopen TID study recommended a project to improve Minos Conaway Road. The project is not funded.
• C-14 – Study the feasibility of installing a “YOUR SPEED” display on southbound Route 1 at Nassau Road
  • To be initiated in 2021.
  • Funding must come from legislators’ Community Transportation Funds.
  • If a sponsor is found, DelDOT will perform the technical study and install the display.
• C-19 – Study the feasibility of an all-way STOP at Beaver Dam Road and Kendale Road
  
  • Based on a safety study, an all-way STOP may not be an appropriate countermeasure, especially with the curvature of the roadway and potential to increase rear-end crashes.
  
  • A roundabout was studied but is not adequate for 2045 traffic.
  
  • The Henlopen TID study recommended a traffic signal by 2045; it will be installed when a signal warrant is met.
  
  • This study is now COMPLETE.
Category C progress

• C-20 – Study the feasibility of replacing the HAWK signal with a full signal at Holland Glade Road, potentially with a fourth leg at the outlets

  • In conjunction with proposed development of Coastal Station on the east side of Route 1 at Holland Glade Road, the HAWK signal will be removed and replaced with a full signal and a four-way intersection.

  • The intersection, including a west leg to the outlets, is now in final design.

  • This study is now COMPLETE.

</table>
D-2 – Study the feasibility of potential connections for walking and bicycling between existing neighborhoods, along streets, and to trails

- To be initiated in 2021 in conjunction with the SR 1 Low-Stress Bikeway Study.
• D-6 – Study the feasibility of pedestrian bridges over Route 1 at specific locations

• To be initiated in 2021.

• This recommendation was initially proposed by the public and received a high response in the public survey during Phase 1.

• The study will look for locations of existing and future pedestrian crossing demand away from intersections.

• To be coordinated with D-10.
Category D progress

• D-6 – Study the feasibility of pedestrian bridges over Route 1 at specific locations (continued)
  • Do you have any initial ideas about locations (NOT at intersections) to be considered?
Category D progress

- D-8 – Study the feasibility of a park and ride lot on Route 24 at the edge of the study area
  - To be initiated in 2021.
  - DTC supports implementing a Park and Ride along SR 24, but an exact location has not yet been determined.
Category D progress

• D-9 – Identify potential connections to and from the Lewes Transit Center
  • This is being examined as part of the SR 1 Low Stress Bikeway Study.
Category D progress

• D-10 – Study the feasibility of a barrier in the median of Route 1 to deter pedestrian crossings at inappropriate locations
  • To be initiated in 2021.
  • To be coordinated with D-6; deterrence of at-grade crossings is appropriate where a pedestrian bridge is being considered.
Category D progress

• D-15 – Study opportunities for pedestrian crossings on Kings Highway and Freeman Highway.
  • Rectangular Rapid Flashing Beacons (RRFBs) are now installed but not operating.
  • DRBA intends to turn them on.

• E-7 – Evaluate the potential transportation benefits, costs, and impacts of a new through road connecting Postal Lane with the intersection of Old Landing Road/Airport Road

  • Airport Road extension to SR 24 is in progress.
  • Extension from SR 24 to Postal Lane is recommended by the Henlopen TID study, but that section will be more difficult due to existing developments.
Phase 2 implementation plan

• Next steps
  • Continue work on recommendations
  • Provide email progress updates in February and March
  • Convene the Working Group on April 26, 2021
  • Prepare annual report for 2020, to be issued in spring 2021
  • Hold public workshop in May or June 2021
• DelDOT and Sussex County have initiated the Coastal Corridors Study
  • Encompasses Route 16 and Route 404 between the Maryland state line and Route 1, just west of the Five Points study area
  • Started a listening tour in late 2020
  • Virtual public meetings will be held this spring
Thank you for your participation!

Phase 2 Working Group Meeting #6

October 26, 2020, 6:00 pm
Online

Members present:
I.G. Burton
Robert Fischer
Doug Hudson
DJ Hughes
Todd Lawson
Sen. Ernesto B. Lopez
Lloyd Schmitz
Rep. Steve Smyk
Kim Hoey Stevenson
Josh Thomas
Ann Marie Townshend
Gail Van Gilder

Members absent:
Greg Christmas
Dennis Forney
Scott Green
Rev. Wendell B. Hall
Christian Hudson
Carole Kohr
Rep. Peter Schwartzkopf
Helen Truitt

This was a virtual meeting on DelDOT's WebEx platform. The meeting began with a quorum of 11 Working Group members present. Two additional members joined while the meeting was in progress for a total attendance of 13.

Andrew Bing welcomed everyone and provided information to the public on how to use the online chat function to make comments or ask questions. He noted that the public would have the opportunity to comment at the end of the meeting.

Andrew went over the agenda and summarized the contents of the meeting packet that was emailed to the members of the Working Group prior to the meeting. The minutes of the July 27, 2020 Working Group meeting were approved unanimously.
Nicole Majeski, DelDOT’s Deputy Secretary, gave some opening remarks. She is Governor Carney’s nominee to be the cabinet member representing the Delaware Department of Transportation. Upon Jennifer Cohan’s retirement on November 1, Ms. Majeski will be Acting Secretary of Transportation until confirmed by the state Senate.

Deputy Secretary Majeski thanked Working Group members for all their participation and engagement in the Five Points process. She is proud of the effort everyone has put forth to make this a success. Because of the ideas and input from the Working Group and the public, DelDOT has been able to lay the groundwork for dozens of improvements for the area. She reiterated DelDOT’s full commitment to the Five Points effort and partnership with Sussex County, and noted that DelDOT has allocated a significant amount of funding to projects in Sussex County over the next six years. She looks forward to working with this group.

**Henlopen Transportation Investment District (TID)**

Marc Coté, DelDOT’s Director of Planning, gave an update on the TID status.

The updated Memorandum of Understanding (MOU) between DelDOT and Sussex County was completed on September 22, 2020. The MOU sets the conditions for coordinating land development with transportation improvements.

DelDOT presented the TID agreement to Sussex County Council on September 22. DelDOT is presenting the TID agreement at the October 27 Sussex County Council meeting and hopes to get a vote to approve the agreement.

DJ Hughes asked about the TID fee structure. Marc responded that the fee is based on trips. The base unit for residential development is the single-family dwelling; for commercial, there are several base units such as office or retail. For purposes of the TID fee, the trips for a specific type of residential or commercial development are calculated as a percentage of the trips generated by the base. Marc said more detailed information can be provided after the Working Group meeting.

All of the information on the Henlopen TID will be on the DelDOT website.
Active Projects and Studies in the Five Points Area

Shanté Hastings, who will be Acting Deputy Secretary as of November 1, presented a map illustrating all of DelDOT’s activities in the Five Points area and provided a description of each. This information included whether the project was in the study stage, in planning, design or construction, as well as an estimated start or completion date where available. The map will be located on DelDOT’s website with materials for this working group meeting.

Bob Fischer asked whether a separate map could be created showing just new bike facilities to be built under CTP projects. Shanté responded that such a map might be helpful, and the project team will consider how to illustrate it. Marc noted that virtually every project will have a bicycle/pedestrian component, consistent with DelDOT’s Compete Streets policy.

DJ commented that the short-term project to lengthen the left turn lane on SR 1 at Cave Neck Road will have a significant positive impact.

DJ asked whether a decision has been made on constructing a two-way left turn lane on Savannah Road. It is not shown on the project map, although a sidewalk project is shown. Jeff Riegner responded that the Lewes Byway Committee has said they will seek funding to undertake a byway master plan for Savannah Road. The two-way left turn lane will be considered as part of that master plan. Because of the time needed to complete that plan if it were funded, the sidewalk project will move ahead.

DJ asked whether the new signal at Kings Highway and Clay Road will be coordinated with the signal at Kings Highway and Gills Neck Road. The project team will check and provide a response. [Follow-up from the project team: Both traffic signals are part of the statewide computerized signal system, which is operated and managed from DelDOT’s Transportation Management Center (TMC). The central computer receives real time information from vehicle detectors located at both locations in order to assist with cycle lengths and progression (coordination) between the intersections.]

There is a petition to maintain a crossover for southbound SR 1 north of the Five Points signalized intersection, so traffic does not have to go through that signal to return north. Currently southbound traffic must turn left onto Savannah Road and take the loop ramp to SR 1 north, passing through the signal twice. Shanté stated that DelDOT is looking at maintaining a crossover and will get counts next spring and summer. She also said DelDOT is looking to improve the southbound left-most left turn lane at Five Points to allow the U-turn, which is currently prohibited.
Mulberry Knoll Road Extension Study

Jeff Riegner described this study, which was recommended by both the Five Points Phase 1 Working Group and the Henlopen TID Study. This study will evaluate extending Mulberry Knoll Road, widening Plantation Road, or possibly both to see which improvement should be advanced first to benefit travel in the area. A study area has been drawn which excludes developed areas and Jimtown. Inventory and mapping of historic resources and wetlands are underway. Opportunities for public involvement will be provided during the study.

Implementation Plan Status

Jeff described the implementation plan status and progress that has been made since the July 27, 2020 update that is posted on the study website.

Another of the recommendations to be initiated in 2020 is now in progress:
- C-6 – Study the feasibility of lengthening left- and right-turn lanes throughout the study area. DelDOT Traffic is evaluating locations suggested by the Working Group at the January 27, 2020 meeting.

All but two of the recommendations to be initiated in 2020 are now in progress.

One of the recommendations is now complete:
- D-14 – Study the feasibility of signing and/or pavement markings that will improve bicyclist comfort turning left from Dartmouth Drive onto Route 1. A bike box is not feasible at Dartmouth Drive. Additional safety measures may be considered as part of the Kings Highway CTP project. In the meantime, bicyclists may cross SR 1 with pedestrian signals.

Three more recommendations are now programmed as CTP projects.
- C-1 – Route 9 widening from Ward Avenue to Old Vine Boulevard.
- C-3 – Old Landing Road and Warrington Road intersection.
- C-5 – Cave Neck Road, Sweet Briar Road and Hudson Road intersection. The schedule for C-5 may be accelerated through FAST (Funding Accelerating Safety in Transportation), for which approval is pending. Todd Lawson introduced the FAST concept to County Council on October 6, to accelerate projects that are already in the CTP and that have great safety benefits. Under the FAST concept, the County would provide design, right of way and construction funding up front and DelDOT would reimburse the County in the CTP year.
The progress of implementation since July 2020 is described in detail in the presentation slides and on the implementation plan status spreadsheet. This information is in the Working Group meeting packet, which is available to the public on the Five Points website at 5points.del dot.gov. A video of the presentation is also available on DelDOT’s YouTube page (delawaredot).

Working Group Comments and Questions

For some of the recommendations, Working Group members raised questions or provided comments as described below.

- Senator Lopez expressed his appreciation to County Council for the idea of FAST. The intersection of Cave Neck Road, Sweet Briar Road and Hudson Road needs to get done first and he looks forward to being of help.
- Bob Fischer asked whether the bike trail between Georgetown and Lewes will always remain a trail, and never become a roadway. Marc said that DelDOT is working to complete the trail to Georgetown and it will be a trail for the foreseeable future.
- Gail Van Gilder would like more information on how the developer TID contribution is calculated. As projects come along, how much are developers going to contribute and will it be enough to do what needs to be done? [Follow-up from the project team: More detailed information on the TID will be provided at a future meeting.]

Presentation on DelDOT’s Traffic and ITS Program

Gene Donaldson, DelDOT’s Transportation Management Center (TMC) Operations Manager, provided a presentation that covered the many aspects of DelDOT’s Traffic and ITS program. Gene’s group performs three functions: control, monitoring, and information. Presentation topics included:

- DelDOT’s integrated transportation management system (ITMS)
- ITMS strategic plan
- Transportation Operations Management Plan (TOMP), to be updated for Sussex County in 2023
- Transportation Management Center (TMC)
- Signal systems and operations
- Artificial Intelligence ITMS objectives and deployment
Gene emphasized that traffic signals cannot add capacity. Once an intersection has reached the capacity limits of its travel lanes and pedestrian crossing requirements, signals only act to allocate delay among the intersection approaches. He explained how very wide pedestrian crossings act to increase traffic delays and noted the importance of planning for pedestrian crossings at the beginning of any project.

Gene said that all traffic signals in the state are now connected to the Transportation Management Center (TMC) and can be controlled from the TMC.

Gene is particularly excited about advancements in artificial intelligence (AI) for traffic management. Humans cannot process information quickly enough to monitor all the systems and make decisions quickly. He noted that Delaware is in the forefront of AI implementation for traffic monitoring and control in the country. DelDOT has embarked on a three-year AI deployment/implementation and monitoring program across three areas of the state.

After the presentation, Bob Fischer asked about real-time sensing technologies. When will DelDOT be able to know where vehicles are, what are the queue lengths that are waiting to get through a light, etc. in real time? Gene responded that DelDOT is transitioning away from loop detectors in the roadway. The agency is testing AI machine vision. Besides counting cars, it can identify vehicle make and model and count bicyclists and pedestrians. DelDOT will integrate technology as it becomes available.

The video recording of the meeting on YouTube includes the full Traffic/ITS presentation.

Jeff summarized the next steps in the Working Group process:
- Updates on the implementation plan will continue.
- The next meeting will be held January 25, 2021. This meeting is likely to be online.
- Email progress updates will be sent in November and December.
- An annual report of progress made in 2020 will be issued in spring 2021.

Andrew invited public comment.
Public comments

- Mr. and Mrs. Cross asked whether the Mulberry Knoll Road route is the same as the Yellow Route for the Western Parkway. If so, they would lose their home. Jeff responded that in 2007, DelDOT studied several alternative routes for a possible four-lane highway. The Western Parkway study was discontinued. The Mulberry Knoll Road Extension study area is wide, and no options have been determined for where the road would be. Also, this is a long-term project with many steps, with public involvement throughout the planning and project development process, so there will be ample opportunity for the Crosses and other interested citizens to have input before any decisions are made.

- A participant asked whether DelDOT requires construction to be performed at times when impacts to traffic are low, for example at night, or in the winter. Shanté responded that construction contracts specify time-of-day work hours. On beach routes, construction is typically done in the fall, winter, and early spring. But temperatures control when paving can be done. Night work must be approved if it is next to residential areas, so contractors can’t always shift to night work. DelDOT is sensitive that disruption from construction should be minimized, but also doesn’t want to limit the times so much that the project drags on for years.

- A participant asked why all the passing zones were eliminated on Cave Neck Road from Milton to Route 1. Shanté responded that she would need to check into that specific area, but in general, passing zones are evaluated based on crash data and specified safety standards. Shanté will check with DelDOT Traffic.

- Diane O’Hagan asked what type of traffic signal operation is in effect at the Five Points signal. Gene Donaldson replied that the signal is coordinated with other intersections on SR 1, and it is the critical intersection in Zone 20 (Five Points to Dewey). Coordination uses information from detectors on northbound and southbound SR 1. At the Five Points intersection there are detectors on Route 9 and in the left turn lanes of SR 1. SR 1 overall is controlled by the TMC central computer.

- Theresa Baldwin asked whether it will be possible for pedestrians to cross SR 1 at the Lewes Park and Ride. Shanté replied that DelDOT currently has a study underway to figure out how and where crossings of SR 1 should be provided (the SR 1 Low Stress Bikeways Study shown on the Five Points project map). This study will include evaluation of pedestrian access to the Park and Ride.
A participant asked why there are not any passing zones on Old Orchard Road or New Road. The speed limit is low. Shanté said it may be because of the many side streets and driveways, but she will have the project team look at the issue further.

Andrew closed by thanking departing Secretary Jennifer Cohan for all her work with Todd Lawson in starting and supporting the Five Points effort since 2017.

Andrew adjourned the meeting at 7:52 pm.

Public attendance online

Registration was not required, so the number of attendees is not available. Attendees’ names were not recorded unless they were provided during the public comments period.
List of Henlopen TID Transportation Improvements

New Connectors
- Airport Road from Old Landing Road to Postal Lane
- Extension of Mulberry Knoll Road to provide a connection between Cedar Grove Road and Route 9
- Potential new roadway connections between Plantation Road and Mulberry Knoll Road and between Cedar Grove Road and the other new roadway
- Upgrade Nassau Commons Boulevard from a private roadway to a state-maintained road meeting DeIDOT local road standards

Proposed Widening
- Route 9 from about 900 feet west of Old Vine Boulevard to Ward Avenue; a two-way center left turn lane is needed from about 250 feet east of Nicole Lane to Church Street
- Route 23 from about 1200 feet southwest of its existing intersection with Fisher Road to the Phase 1 Plantation Road improvements
- Plantation Road from Robinsonville Road to Route 24 (depending on the results of the Mulberry Knoll Road extension study)
- Route 24 approaches to the Robinsonville Road/Angola Road intersection in both directions
- Route 24 from about 600 feet south of the intersection with Jolyns Way to Eventers Way, to tie into DeIDOT’s current Route 24 CTP project
Traffic Signals
- Airport Road and Miller Road
- Airport Road and Old Landing Road
- Old Landing Road and Rehoboth Mall entrance
- Airport Road Extension and Route 24
- Route 24 and Mulberry Knoll Road
- Route 24 and Jolyns Way
- Plantation Road and Craig Boulevard/new connector road
- Plantation Road and Robinsonville Road
- Mulberry Knoll Road Extension and Route 23
- Mulberry Knoll Road Extension and Route 9
- Kendale Road and Robinsonville Road
- Kendale Road and Route 23

Roundabouts
- Warrington Road and Old Landing Road
- Cedar Grove Road and a new connector roadway
- Cedar Grove Road and Mulberry Knoll Road
- Cedar Grove Road and Robinsonville Road
- Robinsonville Road and Mulberry Knoll Road Extension
- Robinsonville Road and Jolyns Way Extension
- Robinsonville Road and Conleys Chapel Road
- Route 23 intersections with Indian Mission Road, Hollymount Road, Conleys Chapel Road, Stockley Road, and Hopkins Road

Turn Lanes
- Nassau Commons Boulevard and Route 9
- Minos Conaway Road and Route 9
- Route 23 and Jimtown Road
- Jimtown Road and Robinsonville Road
- Cedar Grove Road and Ward Road
- Robinsonville Road and Webbs Landing Road
- Robinsonville Road and Harts Road
- Route 24 and Dorman Road
- Dorman Road and Conleys Chapel Road
- Conleys Chapel Road and Wil King Road
- Camp Arrowhead Road and Jolyns Way
- Camp Arrowhead Road and Waterview Road (both north and south)
- Angola Road and Angola Beach Road
- Angola Road and Camp Arrowhead Road
- Along Old Landing Road for access improvements to existing subdivisions
Other Improvements
- One-way stop signs on the Airport Road Extension approach at Postal Lane, the new connector road approach at Mulberry Knoll Road, and the new connector road approach to the other new connector road (see the TID website for details)
- All-way stop at the intersection of Wil King Road and Kendale Road
- An extension of Jolyns Way from Route 24 to Robinsonville Road
- Removal of the roadway connection from Harts Road to Route 24
List of upcoming meetings
Phase 2 Working Group

Meeting #8
April 26, 2021, 6:00 pm
Location to be determined

Meeting #9
July 26, 2021, 6:00 pm
Location to be determined

Meeting #10
October 25, 2021, 6:00 pm
Location to be determined

Meeting dates, times, locations, and agendas are subject to change.

See the Delaware Public Meeting Calendar at publicmeetings.delaware.gov for official meeting notices.

## B. Implement policies and procedures to make the area more efficient, sustainable, and beautiful

| B 1      | Y  | 34       |               | Require new developments to plan for interconnections to any future development areas and monitor to ensure implementation | Sussex County | DelDOT | $         | N/A      | N/A      | N/A         | ONGOING  | All subdivision applications are subject to pre-application meetings. Where the potential for interconnectivity to undeveloped parcels is identified, this is discussed with developers prior to application submittal. |
| B 2      | Y  | 86       |               | Consider modifications to land development requirements and/or the Development Coordination Manual that require additional buffers/setbacks for all new developments for future road expansion | Sussex County | DelDOT | $         | N/A      | N/A      | N/A         | IN PROGRESS | In 2020, the Sussex County Planning & Zoning Commission discussed a potential future revision to the Zoning Code to clarify the maximum extent to which parking may be permitted in the front yard setback. In addition, DelDOT has updated the Development Coordination Manual to require greater width along principal arterials, which are the routes most likely to require future widening. |
## FIVE POINTS TRANSPORTATION STUDY
### IMPLEMENTATION PLAN STATUS REPORT

Updated January 25, 2021 [red text indicates changes]

### Category | ID | Priority | Old idea no. | Working Group recommendation | Assumed lead agency | Other responsible parties (if any) | Study cost | Study timeframe | Imp. cost | Imp. timeframe | Imp. impacts | Status | Remarks
--- | --- | --- | --- | --- | --- | --- | --- | --- | --- | --- | --- | --- | ---
B | 3 | Y | 4 | Study the feasibility and anticipated effectiveness of modifying signage, starting in Milford, to encourage through drivers (to points outside the Route 1 corridor between Lewes and Dewey Beach) to use Route 113, Route 5, Route 23, etc. | DelDOT - Traffic | Private partner(s) such as Waze | $ | * | $5 | * | 0 | COMPLETE | An additional sign was installed on southbound SR 1 south of Thompsonville Road to identify municipal destinations and distances. Anticipated effectiveness of guide signs is decreasing as more and more people rely on GPS/route guidance systems. Travel time messages are now displayed on these variable message signs approaching the beach area. This information is also available on the DelDOT app.
B | 4 | Y | 91 | Improve advance acquisition process to allow DelDOT to more quickly acquire land needed for transportation improvements and acquire available land within the Five Points Study Area (e.g., Creative Concepts) | General Assembly | DelDOT | $ | * | N/A | N/A | N/A | COMPLETE | New advance acquisition regulations were approved in 2018. Now proactive purchases will be feasible.
B | 5 | Y | 50 | Study the feasibility of converting the Arby’s driveway between Route 1 and Savannah Road into a publicly-accessible road | DelDOT - Planning | DelDOT - Real Estate and PD South; property owners | $ | * | $5 | * | 0 | IN PROGRESS | DelDOT is reviewing potential options as part of development reviews. Coordinate with B-1 and C-12.
B | 6 | Y | 14 | Incorporate more walkable, bikeable, mixed-use town centers into the comprehensive plan | Sussex County | | $ | * | N/A | N/A | N/A | Longer-term | At its October 27, 2020 meeting, Sussex County Council approved the Henlopen TID agreement. The Henlopen TID recommendations are related to Five Points Recommendations A-6, A-7, C-1, C-3, C-7, C-19, E-2, and E-3. Because most available land on the east side of Route 1 has already been developed or approved for development, there is limited value to a TID in this area.
B | 7 | Y | 89 | Continue TID studies both east and west of Route 1 | DelDOT - Planning | Sussex County, City of Lewes | $5 | * | TBD | TBD | TBD | COMPLETE | DelDOT has reached out to DNREC to obtain information on their current parking count and monitoring practices and historic lot count data. Coordinate with recommendation B-3.
B | 8 | Y | 62 | Study the feasibility of a parking management system to alert travelers when parking lots at major destinations are full | DelDOT - Planning | DelDOT Traffic, DTC, property owners, businesses, DNREC, private | $5 | * | $55 | * | 0 | IN PROGRESS | DelDOT has reached out to DNREC to obtain information on their current parking count and monitoring practices and historic lot count data. Coordinate with recommendation B-3.
B | 9 | N | 69 | Study enhancing New Road per Byway Master Plan | DelDOT | City of Lewes, Sussex County, Delaware Greenways, Byway Committee | N/A | N/A | $55 | * | 0 | ONGOING | The New Road Master Plan was endorsed by the Lewes Mayor & City Council on July 13, 2020. In addition, they approved the Byway’s request to transition to a citizen-led Byway Committee with representation from the City on the committee. The New Road bridge over Canary Creek is being designed in accordance with the Master Plan. Improvements along frontages of new development will be addressed by developer agreements.
B | 10 | N | 94 | Endorse “don’t block the box” legislation with camera enforcement | General Assembly | Delaware State Police, DelDOT | $ | ** | $5 | * | 0 | Longer-term |
B | 11 | N | 87 | Ensure cost savings from transportation projects within the study area are re-invested in projects within the study area | General Assembly | | $ | * | N/A | N/A | N/A | Longer-term |

<td>DTC</td>
<td></td>
<td>$</td>
<td>*</td>
<td>$$$</td>
<td>*</td>
<td>0</td>
<td>IN PROGRESS</td>
<td>DTC studied the feasibility of providing traditional fixed route transit service to Milton/Red Mill Pond/Minos Conaway Road area and presented the findings to the 5 Pts. Transportation Advisory Group in January 2020 as not feasible at this time. DTC has improved service connections for transit transfers between Routes 206 and 303, which make the connection from the Lewes Transportation Center to Milton. DTC is studying other types of non-traditional transit service options to this area that are better suited to operate given the economic, road geometry and environmental factors. Statewide, DTC is looking to create micro transit service delivery options in select areas, to operate as a pilot. Additionally, DTC will be applying for grants to support these proposals.</td>
