Phase 2 Working Group Meeting #5

Monday, July 27, 2020, 6:00 pm
Online

1. Introduction
   • Welcome
   • Summary of notebook materials
   • Approval of January 27, 2020 meeting minutes

2. Working Group perspectives

3. Recap of May-June virtual open house

4. Phase 2 implementation status

5. Presentation on DelDOT’s bicycle program

6. Public comment

7. Adjourn
Agenda

• Introduction
  • Welcome
  • Summary of notebook materials
  • Approval of January 27, 2020 minutes

• Working Group perspectives
• Recap of May-June virtual open house
• Phase 2 implementation status
• Presentation on DelDOT’s bicycle program
• Public comment
How to raise your hand
How to raise your hand
• Welcome

• Summary of notebook materials
  • Agenda
  • Presentation
  • Draft minutes of January 27 Working Group meeting
  • List of upcoming meetings
  • Updated implementation plan

• Approval of January 27, 2020 meeting minutes
• Perspectives on process
  • Meetings / virtual open house
  • Communications
  • Inclusivity

• Other observations
The virtual open house had two parts:

- Meeting materials, including a survey, on the study website, 5points.deldot.gov
- Five online drop-in sessions held between May 18 and June 6, at a variety of times and days of the week to reach as many people as possible – 75 people participated
Virtual open house

**Survey results:**

- 80% agree/strongly agree that the Five Points Transportation Study process is informative
- 53% are pleased with the progress made on study recommendations in 2019
- 67% like the amount of information/detail or would prefer more information in the Following Five Points email updates
- A topic of interest for future Following Five Points email updates was shared-use pathways
• The drop-in sessions also included interactive poll questions:
  • Most participants heard about the virtual open house through Following Five Points email updates
  • Most respondents were age 50 and over, with the bulk of those age 65 and over
  • The majority of people liked the online format, either in conjunction with in-person meetings or instead of in-person meetings
Virtual open house

What feedback would you like to offer on the virtual open house?
### Phase 2 Implementation Plan Update

April implementation status

- Although we didn’t meet in April as originally scheduled, materials were posted on the study website.
  - Video presentation with transcript
  - Updated implementation plan spreadsheet
78 recommendations

Recommendations to be implemented under current DeIDOT projects or initiatives (7 recommendations)

Implement policies and procedures to make the area more efficient, sustainable and beautiful (8 priorities out of 27 recommendations)

Make the most of existing roadway infrastructure (8 priorities out of 20 recommendations)

Make walking, bicycling, and transit more viable as alternatives to driving (5 priorities out of 15 recommendations)

Invest in new infrastructure to support anticipated growth (3 priorities out of 9 recommendations)
39 of 78 recommendations in progress, ongoing, or completed

• 7 of 7 in Category A – to be addressed by current DelDOT projects or initiatives
• 11 of 27 in Category B – policies and procedures
• 12 of 20 in Category C – make the most of existing infrastructure
• 6 of 15 in Category D – bicycle, pedestrian, transit
• 3 of 9 in Category E – major infrastructure improvements
42 of 78 recommendations in progress, ongoing, or completed

- 2 of 5 recommendations to be initiated in 2020 are in progress
- 3 recommendations remain to be initiated in 2020

• B-3 – Study the feasibility and anticipated effectiveness of modifying signage, starting in Milford, to encourage through drivers (to points outside the Route 1 corridor between Lewes and Dewey Beach) to use Route 113, Route 5, Route 23, etc.

• DelDOT will soon begin testing of displaying (automated) travel time information on various variable message signs approaching the beach area (including information north of the SR 1 and US 113 split).
• **B-9 – Study enhancing New Road per Byway Master Plan**
  
  • The New Road Byway Master Plan was endorsed by the Lewes Mayor & City Council on July 13.
  
  • In addition, they approved the Byway’s request to transition to a citizen-led committee with representation from the City on the committee.
  
  • The New Road bridge over Canary Creek is being designed in accordance with the Master Plan.
Category B progress

• B-21 – Study frequency and causes of emergency vehicle preemption and make recommendations to balance emergency vehicle access with traveler mobility
  • New signal controllers that will enhance recovery from preemption were deployed along the corridor.
  • The vendor is working on firmware updates to take advantage of this feature.
• B-25 – Identify the costs and benefits of dedicating Nassau Commons Boulevard to public use
  • Now IN PROGRESS.
  • DelDOT is working with the developer of the Vineyards to upgrade the portion of the Boulevard adjacent to Route 9 and add turn lanes.
  • Part of the Boulevard will be dedicated to public use as part of this project.

• C-8 – Study the feasibility of restriping two-lane sections of Savannah Road with a two-way left-turn lane
  • DeIDOT study is COMPLETE.
  • The Byway Committee is investigating moving forward with a master plan for Savannah Road that will consider whether a two-way left-turn lane should be provided.
• C-9 – Evaluate potential short-term safety and operational improvements at Route 9, Plantation Road, and Beaver Dam Road while longer-term improvements are under development
  
  • Now COMPLETE.
  
  • Signing and striping improvement was implemented in spring of 2020 to better organize and direct westbound Route 9 traffic flow.
Category C progress – C-9
Category C progress

• C-12 – Study access management opportunities along Route 1 in the study area, including potential connections between businesses

  • Now IN PROGRESS.
  • Sussex County is actively pursuing interconnectivity in all commercial projects along Route 1
Category C progress

• C-20 – Study the feasibility of replacing the HAWK signal with a full signal at Holland Glade Road, potentially with a fourth leg at the outlets
  • Coordination continues with developer. A new plan was received by DelDOT Development Coordination.

• D-1 – Study the feasibility of a hop-on, hop-off van or jitney service loop for Lewes similar to free service in Cape May (Five Points, hospital, Lloyds Grocery Store, downtown Lewes, Library, Lewes Beach, Ferry, State Park, etc.)

  • Primary lead would need to be the municipality.
  • DTC’s role would be advisory to determine feasibility, and to serve as a partner to any study effort.
• D-7 – Study the feasibility of transit service to tie the Milton/Red Mill Pond/Minos Conaway Road area into the transit network
  • Study conducted. Traditional fixed-route service not feasible at this time.
  • DTC has improved service connections for transfers between Routes 206 and 303, which make a connection from the Lewes Transportation Center to Milton.
• D-7 (continued)
  • DTC is studying other types of non-traditional transit service options to this area that are better suited to operate given the economic, road geometry and environmental factors.
  • Statewide, DTC is looking to create micro transit service delivery options in select areas, to operate as a pilot.
• D-11 – Study the feasibility of providing context-sensitive shelters at bus stops
  • Now IN PROGRESS
  • Upgraded and improved transit shelters in the Five Points study area. 13 shelters have been installed in the Rehoboth Beach/Lewes area and along the Route 1 corridor at the higher ridership locations.
• Other DTC actions to improve transit in the Five Points area:
  • Expanded fixed route service to serve downtown Lewes on 2\textsuperscript{nd} Street and the Cape May Lewes Ferry Terminal
  • Improved service connections for transfers between Routes 206 and 303.
  • Increased the service frequencies for Route 204 serving Lewes.
  • Studied feasibility of fixed route service to Cape Henlopen State Park; found it was not operationally feasible due to lack of supportive infrastructure, roadway geometry, suitable bus turnaround.
• Other DTC actions to improve transit in the Five Points area (continued):

• Has worked with DelDOT through the project development coordination process in reviewing plans to include transit supportive infrastructure along Freeman Highway, the Route 9 corridor and Kings Highway. For example, DTC requested sidewalk connections along the Route 9 corridor and to establish bus stops near the Library which has been a long standing request from the Lewes community.

BICYCLE LAWS
Bicycle laws

• Delaware’s bicycle laws are found in Title 21 of the Delaware Code, Chapter 41, Subchapter XII
• They are summarized in the Delaware Bicycle Laws brochure at www.deldot.gov/programs/bike
• Today we’ll focus on key parts of the Bicycle Friendly Delaware Act of 2017
A full-size version of this brochure is in your packet.
• Bicycle traffic signals are defined and enabled as an engineering tool for DelDOT
• Requires that motorists change lanes when passing bicycles where travel lanes are too narrow to share
• Clarifies how far to the right bicyclists must ride
Bicycle Friendly Delaware Act

• Motorists may not honk horns at bicyclists except in cases of imminent danger
• Bicyclists are permitted to ride two abreast
• Bicyclists may yield at stop signs when the way is clear rather than coming to a full stop (the “Delaware Yield”)
CONNECTIONS TO TRAILS
Connections to trails

• Five Points Transportation Study recommendation D-2:
  • Study the feasibility of potential connections for walking and bicycling between existing neighborhoods, along streets, and to trails
Connections to trails
Connections to trails
Connections to trails

• **SR 1 Low-Stress Bikeways Study goals:**
  
  • Identify continuous low-stress bikeway routes on either side of SR 1
  
  • Identify low-stress crossings of SR 1 that enable property access and connect the two routes
  
  • Develop recommendations for which segments should be prioritized for design and construction
How the Working Group can Help DeIDOT Advance the Bicycle Program

Title 21. Delaware Code, Chapter 41, Subchapter XII

1. Parents and guardians shall not authorize or permit violation of these laws by the child or ward.

2. Persons riding a bicycle shall have all the rights and responsibilities as drivers of other vehicles.

3. No bicycle shall carry more persons than it was designed to carry, except an adult rider which may carry a child securely attached in a backpack or sling.

4. Persons under 18 years of age must wear a properly fitted and fastened bicycle helmet while operating or riding upon a bicycle on any property open to the public or used by the public for vehicular or pedestrian purposes.

5. A trailer or semi-trailer may be securely attached to a bicycle.

6. Persons riding a bicycle, coaster, roller skates, sled or toy vehicle shall not cling to another vehicle upon the highway.

7. A bicycle shall be ridden “far enough to the right as judged safe by the bicycle operator” except:
   - When passing another bicycle or vehicle going in the same direction,
   - When making a left-hand turn,
   - When avoiding parked or moving vehicles, fixed or moving objects, animals, surface hazards, etc.,
   - When the lane is too narrow for a bicycle and a vehicle to travel safely side by side within the same lane.

8. A bicycle may be ridden near the left-hand edge of the roadway only on one-way highways with two or more lanes and a less than 30 mph posted speed limit.

9. Persons riding a bicycle upon a roadway shall not travel more than two abreast. On a laned roadway bicyclist shall ride within a single lane. Riding two or more abreast is permitted on paths or parts of the roadway set aside for the exclusive use of bicycles.

10. Persons riding a bicycle shall have both hands available to operate the bicycle. At least one hand shall be kept on the handlebars at all times. A one-armed person may ride a bicycle and must use mechanical turn signals.

11. Left turns shall be permitted according to:
   - Normal motor vehicle left turn procedures,
   - Approach the turn on the right edge of the roadway, cross the intersecting roadway, stop out of the way of traffic, yield to all vehicles and pedestrians, obey all traffic control devices and then proceed in a new direction,
   - Special traffic control devices,
   - While not specified in the law, another important option, especially for children, is to dismount and cross the intersection as a pedestrian.

12. Right and left turn signals shall be used not less than 100 feet from turn and while stopped waiting to turn. Such signals may be used intermittently, rather than continuously, if the hand giving the signal is needed to control the bicycle.

13. Turn and slow/stop signals shall be given as shown in the diagram.

14. Persons shall not ride a bicycle on a sidewalk or crosswalk where prohibited by official signs or markings. A person riding a bicycle on a sidewalk or in a crosswalk shall yield to pedestrians and give an audible signal before overtaking. In addition, Subchapter II-A states that bicycles cannot be operated or driven on controlled-access highways, except where appropriately marked by the Department of Transportation.

15. Persons riding a bicycle on a sidewalk, or pushing a bicycle across the road at a crosswalk shall have all the rights and responsibilities of a pedestrian.

16. A bicycle may be parked on a sidewalk except when prohibited by official signs or when impeding the normal, reasonable movement of sidewalk traffic.

17. Bicycles may be parked where vehicle parking is allowed, but may not be parked in such a way as to obstruct the movement of a legally parked motor vehicle.

18. A uniformed police officer may stop, inspect and test a bicycle that is suspected to be unsafe or to have improper equipment.

19. When riding at night, a bicycle shall be equipped with a front, white light visible for at least 500 feet from a motor vehicle with lawful low beam head lamps.

20. Every bicycle shall be fitted with a rear, red reflector visible from at least 600 feet from a motor vehicle with lawful low beam head lamps.

Ride a well-equipped bike. Use a bright headlight, taillight, reflective material and light colored clothing at night and when visibility is poor. White headlights and red rear reflectors are required by law. Never carry anything in your hands that prevents you from riding with both hands on the handlebars.
21. When riding at night, a bicycle shall be equipped with reflective material visible from both sides for at least 600 feet, or a lighted lamp visible from both sides for at least 500 feet, from a motor vehicle with lawful low beam head lamps.

22. A bicycle and its rider may be equipped with additional lights and reflectors.

23. A bicycle shall be equipped with brakes that are capable of stopping the bicycle within 25 feet from a speed of 10 mph on dry, clean, level pavement.

24. A bicycle sold at retail shall have a permanent identification number stamped or cast on its frame.

25. Persons riding a bicycle shall not wear ear or a headset covering both ears. Persons who are hard of hearing should wear a hearing aid while riding a bicycle.

26. Human powered vehicles are activated by means of foot pedals and the driver normally rides astride. Adult cycles are included but all children’s cycles are excluded as are all toys and all vehicles that require the driver to place a foot on the ground to cause motion.

27. Persons shall not ride a bicycle on a highway while under the influence of intoxicating liquor and/or narcotic drugs to a degree which renders such a person a hazard.

28. Bicycle racing on a highway shall only be permitted when approved by DelDOT or local authorities.

29. Persons involved in a bicycle race that has been approved by DelDOT may be exempted from compliance with traffic laws provided that traffic control is adequate to assure the safety of all highway users.

30. “Delaware Yield” permits bicyclists to yield at stop signs (when the coast is clear) instead of requiring a complete stop. Bicyclists are still required to stop a red lights.

Other Considerations

Bicyclists should be aware of their surroundings and the effect their travel might have on others. For example, if a bicyclist notices that a line of vehicles has formed behind the bicycle because it is moving more slowly than other vehicles using the road, the bicyclist should turn off the roadway at a safe location in order to permit the other vehicles to proceed.

For More Information please contact:
The Delaware Department of Transportation Statewide and Regional Planning P.O. Box 778 800 Bay Road Dover, DE 19903 (302) 760-2133

Or visit the Delaware Bicycle Council website at www.deldot.gov/Programs/bike
Obeying Bicycle Laws

Will Keep You Safe!

Riding a bicycle is a great way to get exercise and see the beautiful sights of the First State! While on your bike, however, keep in mind that there are certain laws that every cyclist must follow. These laws ensure the safety of the cyclists, motorists, and pedestrians.

Bicycle safety laws are strictly enforced in Delaware, so be sure to study them carefully!

For Delaware bicycle laws go to www.deldot.gov/Programs/bike

Bicycle Maps
are available from the:

Delaware Department of Transportation
800 Bay Road
Dover, DE 19903
800-652-5600

www.deldot.gov/Programs/bike

Bicycle Riders....
Know the Law
Before You Ride!
Delaware is Serious About Enforcing Bike Safety Laws

1. Use Hand Signals
   - Right Turn
   - Left Turn
   - Stop

2. Right Way to Turn Left
   - Ride on right, carefully move to the left of the lane for left hand turn.

3. Always Ride in the Same Direction as Traffic

4. Use Proper Safety Equipment
   - Helmet (Required by law if under the age of 18, but recommended for all ages.)
   - Reflective Clothing
   - Headlight and Reflectors on Your Bike (Use a rear light if riding at night.)

5. Obey All Traffic Signs & Signals
   - Stop
   - Clear the Intersection
   - Go

6. Don’t Drink & Ride!
   - Drinking and driving laws are the same for cars and bikes. Do not use a cell phone when riding a bike.

7. Headphones Must Not Cover Both Ears!
Meeting Minutes
Phase 2 Working Group Meeting #4

January 27, 2020, 6:00 pm
Beacon Middle School
19483 John J. Williams Highway
Lewes, DE 19958

Members present:
I.G. Burton
Greg Christmas
Robert Fischer
Dennis Forney
Rev. Wendell B. Hall
Doug Hudson
DJ Hughes
Carole Kohr
Todd Lawson
Sen. Ernesto B. Lopez
Lloyd Schmitz
Rep. Peter Schwartzkopf
Rep. Steve Smyk
Kim Hoey Stevenson
Josh Thomas
Ann Marie Townshend
Helen Truitt

Members absent:
Scott Green
Christian Hudson
Gail Van Gilder

There were 29 members of the public in attendance. Names of those who signed in are listed at the end of these notes.

The meeting began with a quorum of 14 Working Group members present. Three additional members arrived while the meeting was in progress.

Andrew Bing welcomed everyone and noted that the public will have the opportunity to comment at the end of the meeting.
Andrew went over the agenda and summarized the contents of the meeting packet that was provided to the members of the Working Group at the meeting. The minutes of the October 28, 2019 Working Group meeting were approved unanimously.

**DART Bus Service**

John Sisson, Chief Executive Officer of Delaware Transit Corporation (DTC), presented information on existing DART routes serving the greater Five Points area and DTC’s recent investigations into possibilities for additional service.

John noted that DTC has increased bus service over the past several years. “Beach Bus” service runs 7 days per week from May through September. The rest of the year, service operates Monday – Saturday. Routes from outside the region (Dover, Georgetown, Millsboro) travel to a Park and Ride. Multiple routes travel between the Lewes and Rehoboth Park and Rides, so service along Route 1 is frequent in the summer. Total ridership on all routes in the Beach Bus season increased to almost 300,000 in 2019. The Route 201 (Lewes Park and Ride to Rehoboth) accounts for more than 200,000 of these rides.

Parking is currently free at the Lewes Park and Ride and will be free at the Rehoboth Park and Ride next summer. Bus fares are paid upon boarding. One-way base fare is $2.00; reduced fare for seniors is 80 cents. Daily, 7-day and 30-day passes are available that provide unlimited rides. Fares can be paid using the DART Pass App. Bus stop and route information as well as real-time bus tracking is available on the DART Transit App.

John noted that for transit to succeed in gaining ridership, service must be direct and frequent and stops need safe pedestrian access. In addition, a transit route needs a certain level of population density along with origins and destinations that produce demand.

John then described analysis of the Route 204, which provides service every 30 minutes from the Lewes Park and Ride to Lewes and the Ferry. The Phase 1 Working Group recommended study of a hop-on, hop off jitney serving various Lewes destinations including the Library and the State Park. The Route 204 serves many of the destinations mentioned, e.g. Villages of Five Points, the Hospital, downtown Lewes, Lewes Beach and the Ferry, Trip time by bus is only slightly longer than driving. DTC found that trying to serve the Library directly would not be productive since it would involve diverting to Kings Highway, adding time to the trip for others. DTC will evaluate the need for increased frequency on the Route 204, and will explore a Route 204 connection to Cape Henlopen State Park.
Regarding service to Milton, DTC has been talking to Milton officials. DTC studied adding Milton service to the Route 307 (Dover to Lewes Park and Ride via Route 1), however diverting to Milton would add 25% to the trip time. DTC also looked at the possibility of service from Milton via Route 5 and Route 9 to the Lewes Transit Center. However, the low density along this route and the very low Milton ridership on existing bus service through Milton does not appear to support new service. DTC will explore improving the connection between the Route 303 and the Route 206 to provide some transit service from Milton to the Lewes Park and Ride. DTC will continue discussions with Milton officials.

Finally, John reviewed transit shelters. The Phase 1 Working Group recommended a context-sensitive shelter style. DTC has a new standard style shelter that is used state-wide, and intends to use this in the Five Points area. The shelters are attractive and have LED lighting. The shelter at the Lewes Transit Center has a sign with real-time bus arrival information.

Installing a shelter costs $8,000 plus any site work. Maintenance costs about $1,000 per shelter annually, including trash collection, weekly pressure washing, snow removal, etc.

DTC intends to continue to improve bus stops and install shelters at stops that meet the ridership standard and have enough physical space.

**Implementation Plan Status**

Jeff Riegner described the implementation plan status and progress that has been made since the October 28, 2019 Working Group meeting. A new status category, “Ongoing”, was created for recommendations that are continually being worked on as part of DelDOT’s core mission. Three recommendations moved to this category:

- B-16 – Increase the importance of considering noise and lighting impacts of major transportation projects
- B-21 – Study frequency and causes of emergency vehicle preemption and make recommendations to balance emergency vehicle access with traveler mobility
- C-10 – Continue to improve traffic signal phasing, timing and coordination using real time monitoring and control technologies

Two recommendations changed status from “In progress” to “Complete”:

- A-1 – Review the need for grade separating or restricting crossings between Frederica and Lewes before eliminating signals in this area
- B-13 – Study alternatives to both meter and slow southbound traffic approaching Five Points
Five recommendations were newly “In progress”. 42 of the 78 recommendations are now either ongoing, completed or in progress, an increase of nine since October 2019.

DelDOT will initiate work on five recommendations in 2020:

- B-8 – Study the feasibility of a parking management system to alert travelers when parking lots at major destinations are full
- B-25 – Identify the costs and benefits of dedicating Nassau Commons Boulevard to public use
- C-6 – Study the feasibility of lengthening left- and right-turn lanes throughout the study area
- C-12 – Study access management opportunities along Route 1 in the study area, including potential connections between businesses
- D-9 – Identify potential connections to and from the Lewes Transit Center

The progress is described in detail in the presentation slides and on the implementation plan status spreadsheet. This information is in the Working Group meeting packet, and is available to the public on the Five Points website at 5points.deldot.gov.

**Working Group Input – Locations for longer turn lanes**

Recommendation C-6 “Study the feasibility of lengthening left-and right-turn lanes throughout the study area” will begin in 2020, and Jeff asked the Working Group for input on locations to be studied. Locations mentioned were:

- Northbound Route 1 left turn at Cave Neck Road
- Southbound Route 1 left turn at County Bank
- Southbound Route 1 – right turn lanes at all intersections are very short, possibly because they share the bus lane.
- Southbound Route 1 left turn at New Road
- Southbound Route 1 left turn at CVS
- Southbound Route 1 left turn at Dartmouth Drive. The left turn signal time is very short, even when there is no opposing northbound traffic; left turn signal time could be longer
- Southbound Kings Highway right turn at Clay Road (there is no right turn lane today)
- Southbound Minos Conaway right turn at Route 9. Jeff noted this is already a capital project.

DelDOT is looking for shorter term projects. Jeff noted that seemingly minor improvements can be expensive if it turns out there are problems with right of way or utilities.
Savannah Road Two-Way Left Turn Study

Jeff asked for comments on the draft technical memorandum that was provided at the October 2019 working group meeting.

Ann Marie said the Byway Committee submitted a letter to DelDOT requesting a meeting to discuss the two-way left turn lane with respect to the Byway Corridor Management Plan. As far as the City is concerned, Ann Marie has heard support on both sides of the issue. Jeff said at the beginning of the study it was hoped a two-way left turn lane could be accomplished just with striping. It turns out that construction would be needed, so the question is, should this be proposed as a capital project in the next CTP? If so, there will be many more opportunities for input. The Byway Committee letter is attached at the end of these meeting notes.

Dennis Forney said an eastbound back up on Savannah Road occurs where a community is proposed for further development so maybe a center left turn would work there. Jeff noted that unless the development is already too far along, it could be required to make improvements to Savannah Road as part of the development approval.

Working Group Comments and Questions

Carole Kohr read a statement regarding Old Orchard Road, citing need to preserve character and enhance safety, and requesting a comprehensive plan. The full statement is attached to these meeting notes.

Bob Fischer asked about speed limit changes; he received an email notification that the speed limits on Old Orchard Road and New Road were just reduced. **Project team note:** The speed limit on Old Orchard Road and on New Road was reduced to 35 mph in early January 2020. Speed limit studies were initiated by the New Road Master Plan, and due to its similar characteristics, Old Orchard Road was also studied and the lower speed limit recommended. In the same timeframe, Kings Highway was studied as part of the Delaware Byways program and the speed limit was converted to a uniform 35 mph.

Bob Fischer asked if University of Delaware had any plans to expand the Lewes campus. The project team is not aware of any plans for expansion.

Rep. Schwartzkopf said DelDOT should require contractors to check their construction lighting at night. The lighting on the Dewey-Rehoboth Bridge shines in the driver’s eyes so they can’t see. **Project team note:** DelDOT had the contractor adjust the lighting to fix this problem.
Rep. Schwartzkopf said emergency preemption is the number one problem on Route 1; it destroys the traffic signal timing. Jeff noted DelDOT has installed new equipment that will allow signals to get back in synchronization more quickly after a preemption.

Bob Fischer said there should be greater surveillance of actual traffic conditions rather than running signal timing on predetermined programs. He asked for a status update or document about the current conditions.

Ann Marie Townshend said Lewes is in process of planning for tourism directional signs in the City, and Rehoboth will be installing their signs this spring or summer. Sussex County Tourism is responsible for the Route 1 corridor (B-24), but they don’t have funding. She asked whether DelDOT will be providing any funds for implementation. Todd Lawson said Sussex County offered funding. **Project team note:** DelDOT will not be providing funding for Route 1 tourism directional signs.

Regarding the intersection of Cave Neck Road, Hudson Road and Sweetbriar Road (C-5):

- DJ Hughes asked whether there is any way to expedite the capital improvement project, which as of now won’t be constructed until 2027-28. DJ believes a roundabout is a reasonable solution for that intersection.
- Greg Christmas said that a line of cypress trees block sight distance and if they were trimmed back it would improve safety. He said the flexible bollards have made the intersection worse.
- Rep. Smyk stated the trees are in private right of way. The flexible bollards were placed in order to prevent illegal passing, and they have reduced the number of crashes.

Jeff requested clarification from the Working Group on C-11, which roads should be brought to DelDOT standards. DJ Hughes recalled the recommendation was made by Christian Hudson and believes it applies to state roads. Rev. Hall commented that Jimtown Road was just reconstructed and is not up to state standards.

Several members asked what the timeframe is for improvements to the Five Points intersection itself. Jeff replied that will be several years away. Many of the improvements at other locations will relieve Five Points and we want to understand those effects before evaluating what is needed at the Five Points intersection. An interchange was proposed in the past, and that would have enormous impacts to the adjacent lands.
Rev. Hall asked if there are any short-term actions to provide temporary relief. Jeff replied a restriping on westbound Route 9 between Five Points and the connector road will be done sometime in the spring to better organize traffic departing the Five Points intersection.

DJ Hughes believes the Minos Conaway Grade Separated Intersection project will generate more traffic diverting to Minos Conaway Road than DelDOT anticipates.

Helen Truitt said DelDOT should notify people that road improvements will be needed and will need right of way. Developments are closing in on the road. DelDOT has the right to ask for right of way if they know they need it. Jeff agreed, but there needs to be an improvement concept before DelDOT can know how much right of way is needed.

Todd Lawson noted the implementation plan has several references to the TID. The TID is still being developed and is in the final stages. If approved, TID projects will be developed by DelDOT. Drew Boyce elaborated that some projects are already in the CTP. Some, such as new grid road concepts, are just ideas that must go through a full project development process.

Bob Fischer commented that the bicycle trails serve as “super highways”, but a network is needed to allow people to get from their communities to the trails.

Kim Hoey Stevenson asked whether DelDOT has looked at “Don’t Block the Box”. Rep. Schwartzkopf said legislation will be introduced this year.

Jeff summarized the next steps in the Working Group process:
- The next meeting will be held April 27, 2020 at Beacon Middle School.
- Meetings will generally be the last Monday of the month.
- Email progress updates will be sent in months that there is no meeting.
- The annual report of progress made in 2019 will be issued in March 2020.
- A public workshop will be held in May 2020, primarily to inform people what has already taken place.

Andrew invited public comment.

Public comments

- Rich Borrasso of SARG asked how do things move up in the CTP? He is particularly interested in moving up the Cave Neck/Hudson/Sweetbriar Road project. He also asked why wouldn’t we require private roads to be built to State standards? Rep. Smyk asked Mr. Borrasso to see him after the meeting.
• Joe Hoechner was surprised by the change in New Road speed limit and said a reduced speed limit is not needed on New Road. He asked how that came about.
• Jay Tomlinson asked how the Kings Highway project can be moved up on the CTP. That area is faced with a large number of developments adding traffic.
• Bob Viscount of Villages of Five Points agreed with Rev. Hall’s comments on improving the Five Points intersection. He questioned the need to wait longer and try second and third tier solutions. He also expressed disappointment that no one expressed support for Carole Kohr’s statement requesting a comprehensive plan for Old Orchard Road. He is concerned about trail crossing safety and impacts of the Old Orchard Ventures development and traffic diversions from the Minos Conaway project. The Old Orchard Road realignment project is not a comprehensive plan.
• Charlie Daneri commented on the Five Points intersection. The left turns from northbound Route 1 hit a red light on Route 9 at the connector, causing a block-the-box at Route 1. In the short term, look at the timing of that second light.
• Norm Field said development and roads need to go hand in hand. The government is waiting for impact fees and for the tax dollars to come in but that doesn’t solve the problem until after the problem has existed for years. It’s hard to improve roads when you can’t get right of way because it’s already been developed.

Andrew adjourned the meeting at 8:00 pm.

Mark Luszcz, P.E., PTOE
Deputy Director (Design)
Division of Transportation Solutions
Department of Transportation
800 Bay Road
Dover, DE 19901

Dear Ms. Cinelli-Miller and Mr. Luszcz,

As the Historic Lewes Byway representative to the Five Points Working Group, I respectfully request a meeting with you and other DelDOT representatives to discuss the Byway Committee’s concern of adding a Two-Way Left-Turn Lane configuration to Savannah Road from Wescoats Road to Drake Knoll. Our concerns were initially expressed at the October 28, 2019 meeting of the working group. At that same meeting, DelDOT stated that the Byway designation had not been taken into consideration in the initial study completed by RK&K and outlined in a technical memo dated 10/25/19.

The Corridor Management Plan written after extensive public outreach and with funding from our state legislators was signed by Secretary Cohan in October 2015. One goal of the Byway has been to extend the fabric of the city outward rather than bringing Route 1 suburban road design inward. It is the consensus of the Byway Committee that adding a two-way left-turn lane configuration proposes the opposite and is an auto centric plan.

Corridor Management Plans are policy documents. We understand that not every consultant taking on a study will read the entire Corridor Management Plan, however, there are specific sections that speak directly to Savannah Road.

- “Increasing the safety and convenience of walking and bicycling on Savannah Road from Coastal Highway to Downtown Lewes and Lewes Beach is a strategy that builds further upon the transportation strategy “Reduce Vehicular Demand” on page 41. Five specific steps to increase pedestrian and bicycle safety along Savannah Road will also help to use the greater multi-modal transportation connectivity as a recreation opportunity.” (CMP, page 68)
• Coordinate with the planning park and ride by providing opportunities for leaving cars at the Coastal Highway and integrating bicycle racks into a jitney service.
• Extend sidewalks the entire length of Savannah Road.
• Stripe Savannah Road for a bicycle lane on both sides and construct a sidewalk on the northbound side.

Savannah Road is one of the Gateways to Lewes, one of the top four tourist destinations in Delaware. Its quaint historic character is the primary reason for visiting and relocating to the area. The Corridor Management Plan is a road map to maintain the character that differentiates us from other coastal beach towns. If, in an effort to improve auto travel we lose our small town historic appeal, we have all failed in our mission.

We appreciate your consideration of our request for a meeting to discuss alternatives to those proposed by the RK&K study at your earliest convenience, and in advance of any decision making by the working group.

Sincerely,

Gail Van Gilder
Historic Lewes Byway Committee

Theodore W. Becker, Mayor, City of Lewes
Irwin G. Burton III, Vice-President, Sussex County Council
Senator Ernie Lopez

Mary Roth
Chair, Historic Lewes Byway Committee
Carole Kohr statement

The Savannah Rd improvement project and the New Rd Master Plan are great proposals and we appreciate the time, effort and funding being put in to both projects. I would like to mention, though, there is a missing piece. A major connector between these two important roadways is Old Orchard Rd. We hope that the Old Orchard Road realignment team will incorporate the ideas set forth in the New Rd Master Plan and the Savannah Rd improvement project as part of the design plans for the realignment. I understand that New Rd and Savannah Road are scenic byways and the improvement of those roads should keep the history and the character of the area in mind as improvements are made. We want to ensure that Old Orchard Road is considered along those same lines. Old Orchard Road is connected to the Georgetown-Lewes Rail trail. It is a key roadway link in diverting traffic off Route 1. Shouldn’t the conservation priorities and gateway enhancements from the New Road Master Plan extend to Old Orchard Rd? We think that it should. We want the character of Old Orchard to be maintained, along with safety enhancements to address the Rail-Trail issues and pedestrian crossings. Over the last year, The Villages of Five Points action group have shared our fundamental concerns with DelDOT, State, and County officials. How do we advance our concerns to get a comprehensive master plan for Old Orchard Rd with these considerations:

- Traffic calming options
- Widening Old Orchard from Savannah Road to New Road to provide sidewalks on both sides as well as bike lines
- Establishing a lower speed limit
- Establishing a Design for the 3 parcel Old Orchard Ventures land access to ensure safety and adequate traffic flow with the anticipated new volume of over four thousand Average Daily Trips
- Alert drivers approaching the trail by installing speed bumps, rumble strips, stop signs or flashing lights on either side of the trail
- Noting the possible fatal interplay of vehicles, pedestrians & bikers from the Rail Trail intersection, creates compelling new dimensions of risk that require effective solutions.

In short, WE NEED A COMPREHENSIVE MASTER PLAN FOR OLD ORCHARD ROAD.
List of upcoming meetings
Phase 2 Working Group

Meeting #6
October 26, 2020, 6:00 pm
Location to be determined

Meeting #7
January 25, 2021, 6:00 pm
Location to be determined

Meeting #8
April 26, 2021, 6:00 pm
Location to be determined

Meeting dates, times, locations, and agendas are subject to change.

**Remarks**

- Primary lead would be the municipality. DTC’s role would be advisory to determine feasibility, and to serve as a partner to any study effort.
- A new Mobility Committee is proposed under the comprehensive plan. This committee and/or the Working Group could play a role in this effort.
- Portions will be built by current CTP projects on Old Orchard Road and SR 1/Minos Conaway Road, as well as by developer projects. The New Road Master Plan will identify remaining gaps on New Road.
- Portions will be built by current CTP projects on Old Orchard Road and on Savannah Road (between the Georgetown/Lewes Trail and Quaker Road). Assessment of remaining gaps is underway. To be coordinated with C-8. The Byway Committee is investigating moving forward with a master plan for Savannah Road.
