US 113 North / South Study

1

Welcome!

On behalf of the Delaware Department of Transportation (DeIDOT), we welcome you to this sixth round of Public Workshops for the US 113 North/South Study.

This may be your last opportunity to review and comment at a public workshop on the Alternatives Retained for Detailed Study before DeIDOT presents a Draft Environmental Impact Statement (DEIS), including a Recommended Preferred Alternative, late this spring.

Tonight, we invite your comments and input on the refined Alternatives Retained for Detailed Study and, if you wish, on a Recommended Preferred Alternative, the next step in the project development process.

We want to know what you think.

Thank you for sharing your valuable time and insights.

Carolann Wicks

Secretary

Delaware Department of Transportation

Purpose Of Workshop: Present And Listen

The purpose of this sixth round of Public Workshops is to obtain input from you, the public, allowing DeIDOT to further refine the Alternatives Retained for Detailed Study, develop a recommendation for a Preferred Alternative and prepare a Draft Environmental Impact Statement (DEIS). DeIDOT currently anticipates making the DEIS available for public and agency comments in May 2007 and conducting a public hearing in June 2007.

The Retained Alternatives have been refined in response to comments and input from the June 2006 public workshops and the Milford Area Working Group, and the continuing consultation with the Federal and State environmental resource and regulatory agencies.

In response to comments from the Milford Area Working Group and the June 2006 workshops, the Brown Alternative has been included as an Alternative Retained for Detailed Study. It is being evaluated by the Project Team and reviewed by the environmental resource and regulatory agencies in the same detailed manner as the other Retained Alternatives.

Public input throughout this study is welcomed and encouraged. Comments on this round of Workshops will be accepted through March 16, 2007. Information about the study, the Alternatives Retained for Detailed Study and the ability to provide comments and suggestions on the study can be obtained from the project website at <http://deldot.gov/static/projects/us113>.
